

## Missouri Employers Mutual Safety DVD Library as of 6/27/2018

Topic / Industry	Code	DVD Title	Description
Agriculture	338	Ammonia in the Workplace	Ammonia is a hazardous chemical widely used as a refrigerant and in fertilizers. Even low-level exposures of ammonia can irritate the eyes, skin, and respiratory tract. Exposure to higher concentrations can be fatal. Follow strict safety procedures when handling, using, or transporting ammonia. (English)
Agriculture	567	Tractor Safety	This program provides tractor operators with "safety basics," including vehicle operation, pedestrian safety, safe tractor operation, machine guarding, and pre inspection checklists. (English)
Agriculture	568	Unsafe Acts for Agricultural or Farm Workers	This program provides tractor operators with "safety basics," including vehicle operation, pedestrian safety, safe tractor operation, machine guarding, and pre inspection checklists. (English)
Agriculture	569	Vehicle Operations and Safety	Designed for individuals operating any type of farm equipment or vehicle. Covers basic safe driving rules. (English)
Agriculture	570	Employee Safety Orientation for Farm or Agricultural Workers	Meets OSHA requirements for training employees in general hazards exposure. Includes reporting for work, proper clothing, safe lifting, machine guarding, lockout/tagout, and electrical safety. (English)
Agriculture	617	Livestock Safety for Kids	This video is aimed at injury prevention by demonstrating: animal behavior, children's appropriate behavior around animals, hygiene. (English and Spanish)
Agriculture	618	Agro Terrorism	This CD Rom is designed as a tool to help communities integrate AgroTerrorism into their emergency preparedness plans. This important information should be used to guide community leaders in the process of including agroteerrorism in emergency preparedness plans. (English)
Agriculture	708	Spanish Farm Safety DVD Copy 1	New Agricultural DVD Addresses Four Major Safety Topics: Forklift, Heat Stress, Tobacco Baler Safety, Tobacco Harvester Safety. (Spanish)
Agriculture	709	Spanish Farm Safety DVD Copy 2	New Agricultural DVD Addresses Four Major Safety Topics: Forklift, Heat Stress, Tobacco Baler Safety, Tobacco Harvester Safety. (Spanish)
Agriculture	744	Tractor Accidents Can Happen to Anyone	After conducting several farmer focus groups across West Virginia in January and February 2005, a 17-minute ROPS safety video, "A Tractor Accident Can Happen to Anyone," was produced at West Virginia University (WVU). Its objective is to inform local farmers about the risks associated with tractor rollovers and the effectiveness of ROPS and seat belts in reducing traumatic injuries. The video was distributed to over 5,700 farmers in late summer 2005. (English and Spanish)
Construction	313	Silica Training CD-ROM	This CD-ROM tells trainers and employers how to measure and control employee exposure to the hidden hazards of silica. Includes instructor notes. (English)
Construction	314	Get In Touch With Your Loader	The lesson points out the areas on a front end loader where an operator can slip, trip, or fall. It also discusses how to prevent such accidents by using the 3-point climbing system. It concludes with an explanation and impact of the accident's hidden costs to the company and injured party. (English)
Construction	315	Keep It Clean and Safe: Ready Mix Truck Washing Guidelines	This lesson focuses on the different types of mixer truck washes and the harmful effects acid-based truck washes have on our bodies, our environment, and our equipment. Use of the proper PPE's is covered, as well as steps to take in the event of accidental exposure to acid-based truck washing fluids. (English)
Construction	316	Can You See What I am Saying? Contractor to Ready-Mix Driver Hand Signals	12 Contractor-to-Mixer Driver Hand Signals improve production and communication. (English)
Construction	317	Save Your Skin! Straight Facts About Cement & Your Health	This lesson focuses on the dangers and the caustic nature of concrete and related cement products and how it affects our health. Included in the lesson are items of personal protective equipment needed to avoid skin exposure, along with procedures necessary when a person's skin is directly exposed to cement related products. (English)
Construction	318	Safety Basics Video Series Volumes 1-5	The Safety basics video covers important safety topics in just a few minutes each. They're perfect for using with newly hired employees, for showing at the start of a safety talk, or for supplementing your existing training curriculum. (English)
Construction	326	Introduction to Safety: Construction Industry	The construction industry is one of the most dangerous because there are so many hazards present. Common causes of construction injuries include physical overload, falls, impact accidents, machinery accidents, and electrocution. (English)
Construction	379	Roller Compactor Safety	A companion to the Roller Compactor Safety Manual. This DVD discusses a 10-step process to roller compactor safety. (English)
Construction	382	Spanish Language Safety Orientation for Highway Construction	This video was designed to orient the Spanish-speaking worker in the proper use of both personal equipment and situations found on a work site. It provides guidance, as well as step-by-step descriptions of the safety equipment or safety hazards most often found on a construction site. Includes situations involving confined spaces, electrical hazards, and equipment safety. An English translation booklet is included with the video. Recommended as a must for any supervisor involved in training the Spanish-speaking workforce.
Construction	387	Jobsite Safety - Residential Construction	This DVD provides an overview of the key safety issues residential builders and workers need to focus on to reduce accidents and injuries. Based on the NAHB-OSHA Jobsite Safety Handbook, intended to be used as part of an essential residential construction safety-training program. (English & Spanish)
Construction	390	Crawler Excavator Safe Operating Techniques	Safe operating techniques to use in sewer work, road construction, heavy traffic, clinging to a mountainside, taking down a bridge at night or working in a scrap operation. A dynamic video produced and narrated by real operators, specifically for operators. (English)
Construction	394	Backhoe Loader Safety Techniques	Lots of people can drive a backhoe loader. A few people can operate one. This video provides tips on how to operate smoothly and safely in a wide variety of work conditions with several different attachments. (English)
Construction	398	Hand Signals for Construction	This video shows the SAE hand signals in use with various types of construction equipment in a clear concise manner. Visual use of the hand signals published as SAE J1307, verbal explanation of the correct use of established hand signals, how the machine operator responds to clear signals, the effect of hand signals on safety, and situations where hand signals may be the best form of communication. (English)
Construction	408	Scaffold Safety: From the Ground Up part 3 - Cranes, Conveyors and Hoists: Raising the Standard	Provides roofing workers with information they need to work safely on scaffolds. This program also addresses general OSHA regulations that apply to all types of scaffolds and shows the correct ways to set up and use the most common roofing industry scaffolds. It addresses rough-terrain forklifts, operational safety, start-up and shutdown procedures, training requirements and aerial work platforms. (English & Spanish)
Construction	410	Front End Loader 101	Wheel and bucket loaders pose hazards to operators due to load instability, heat, high pressure systems and other hazards common to many types of heavy equipment. This program covers the basics of safe operations working with and around front end loaders. (English)
Construction	426	Boom Lifts for Construction	Boom lifts are the most widely used types of construction equipment. Because of their widespread use, boom lifts are likely to be involved in accidents. For their safety, your workers must master proper boom lift operation with this life-saving program. (English, Spanish, Portuguese)
Construction	428	Scissor Lifts for Construction	Scissor lifts provide a safe walking and working surface on construction sites; however, to cut down on accidents, all employees must be trained in safe and proper operations. This program will provide workers with a sharp and detailed knowledge of this useful machine. (English, Spanish, Portuguese)
Construction	471	Highway Work Zone Safety: The Basics	Highway construction poses threats not only to your workers but also to pedestrians and drivers. Show them the way to on-the-road safety and comply with MUTCD regulations with this informative training program. (English)
Construction	483	Scaffolds: Safety at all Levels	Every year, 4,500 injuries and 50 deaths are caused by scaffolding mishaps. Be sure your workers are familiar with the most up-to-date OSHA requirements and that they know how to stay safe with this essential program. It also covers the requirements of 1926. (English)

Construction	521	Scaffold Safety	How to safely build, use, and dismantle the most common types of scaffolding found in residential construction, such as fabricated frame, pump jack, ladder jack, mobile, and aerial lifts. This video highlights OSHA's general requirements for scaffolding and the key safe work practices that address the most common scaffold hazards on the jobsite. (English & Spanish)
Construction	540	Dump Truck Safety	Safety awareness program, emphasizing job site safety and procedures for anyone operating dump trucks. Reminder on daily maintenance inspections, loading/unloading procedures. (English)
Construction	544	Horizontal Boring	This safety DVD provides valuable information on how to prevent accidents and injuries related to HDD operations. (English & Spanish)
Construction	545	Jobsite Safety DVD	Auger Boring Operations, Hazardous Materials Safety, Heavy Equipment Operations, Personal Protection, Pipe handling, Safety in Flagger, Trench Shoring, Tunneling Safety. (English)
Construction	546	Dozer Safety, Maintenance and Operation Video	450J, 550J, 650J Dozer Safety, Maintenance and Operation DVD. Designed as a supplement to the operators manual. It is divided into three main sections; pre-start walk-around, and daily service on the machine, operator's station with its controls and safety systems, and safety tips when operating the machine. (English)
Construction	547	Hand Signals for Excavators and Backhoes	Correct use of hand signals on a job site can prevent accidents or even save a life. This program looks at hand signals and how they can protect workers in potentially dangerous situations. (English)
Construction	548	Compact Loader Safety, Maintenance and Operation Video	244J & 304J Dozer Safety, Maintenance and Operation DVD. Designed as a supplement to the operators manual. It is divided into three main sections; pre-start walk-around, and daily service on the machine, operator's station with its controls and safety systems, some safety tips when operating the machine. (English)
Construction	549	D-Series Compact Excavator Safety, Maintenance and Operational Video	D-Series Compact Excavator Safety, Maintenance and Operation DVD. Designed as a supplement to the operators manual. This DVD is designed as a supplement to the operators manual. It is divided into three main sections; pre-start walk-around, and daily service on the machine, operator's station with its controls and safety systems, and some safety tips when operating the machine. (English)
Construction	550	D-Series Motor Grader Safety, Maintenance and Operational Video	D-Series Motor Grader Safety, Maintenance and Operation DVD. Designed as a supplement to the operators manual. It is divided into three main sections; pre-start walk-around, and daily service on the machine, operator's station with its controls and safety systems, and safety tips when operating the machine. (English)
Construction	551	Dozer Safety, Maintenance and Operation Video	750J & 850J Dozer Safety, Maintenance and Operation DVD. Designed as a supplement to the operators manual. It is divided into three main sections; pre-start walk-around, and daily service on the machine, operator's station with its controls and safety systems, and safety tips when operating the machine. (English)
Construction	552	C-Series Wheeled Excavator Safety, Maintenance and Operation Video	Designed as a supplement to the operators manual. It is divided into three main sections; pre-start walk-around, and daily service on the machine, operator's station with its controls and safety systems, and safety tips when operating the machine. (English)
Construction	553	844 J Loader Safety, Maintenance and Operation Video	This DVD is designed as a supplement to the operators manual. It is divided into three main sections including an introduction. The three sections are inspection, operation and safety tips. (English)
Construction	554	ZAXIS X-3 Excavator Safety, Maintenance and Operation Video	Zaxis X-3 Excavator Safety, Maintenance and Operation DVD. This DVD is designed as a supplement to the operators manual. It is divided into four main sections including an introduction that you can watch individually or all together. The first two sections look at pre-start walk-around, and daily service on the machine. Main section looks at the operator's station with its controls and safety systems. The third section examines some safety tips when operating the machine. (English)
Construction	555	C-Series and C-Series II Crawler Loader Safety, Maintenance and Operation Video	Designed as a supplement to the operators manual. It is divided into three main sections including an introduction. The three sections are inspection, operation and safety tips. (English)
Construction	556	H-Series Skidder Safety, Maintenance and Operation Video	This DVD is designed as a supplement to the operators manual. It is divided into three main sections including an introduction that you can watch individually or all together. The first main section looks at pre-start walk-around, and daily service on the machine. The second main section looks at the operator's station with its controls and safety systems. The third section examines some safety tips when operating the machine. (English)
Construction	557	Articulated Dump Trucks Safety, Maintenance and Operational Video	This DVD is designed as a supplement to the operators manual. It is divided into three main sections including an introduction. The three sections are inspection, operation and safety tips. (English)
Construction	558	J-Series Backhoe Loader Safety	This DVD is designed as a supplement to the operators manual. It is divided into three main sections including an introduction that you can watch individually or all together. It covers pre-start walk-around and daily service, controls and safety systems for total machine control. (English)
Construction	559	950J and 1050J Dozer Safety, Maintenance and Operational Video	This DVD is designed as a supplement to the operators manual. It is divided into three main sections including an introduction. The three sections are inspection, operation and safety tips. (English)
Construction	560	D-Series Crawler Loader Safety, Maintenance and Operational Video	Designed as a supplement to the operators manual. It is divided into three main sections; pre-start walk-around, and daily service on the machine, operator's station with its controls and safety systems, and safety tips when operating the machine. (English)
Construction	575	Flagger Safety	This DVD has been developed to explain the basic rules of Flagger and to motivate new Flaggers on their job responsibilities. It develops primary rules of Flagger and reinforces the job responsibility of flaggers. It uses scenes from coast to coast and highlights the death of a woman flagger hit by a driver that ignored the rules. (English)
Construction	576	Framer Safety	Orientation program for persons assigned to framing. Meets training requirements of exposure to general hazards. (English)
Construction	577	Safe Material Handling	This safety training video includes safe lifting procedures and other related safety rules for material handlers. (English)
Construction	578	Housekeeping on the Jobsite	Housekeeping on any job site requires teamwork and responsibility. Program stresses individual responsibility, why housekeeping is important and how it improves the overall safety efforts. (English)
Construction	579	Subcontractor Safety Orientation	Excellent program to provide training to subcontractors on the job site. Helps reduce liability and injury exposures. (English)
Construction	630	Backhoe Attachment English	The purpose of this course is to impart rules and practices for the safe operation of the Bobcat® backhoe attachment. (English)
Construction	631	Backhoe Attachment Spanish	The purpose of this course is to impart rules and practices for the safe operation of the Bobcat® backhoe attachment. (Spanish)
Construction	632	Forestry Cutter Maintenance Training	This DVD covers the forestry cutter maintenance and safety. (English)
Construction	633	Excavator Operator Training ENGLISH	The purpose of this course is to impart rules and practices for the safe operation of Bobcat® brand compact excavators. (English)
Construction	634	Excavator Operator Training SPANISH	The purpose of this course is to impart rules and practices for the safe operation of Bobcat® brand compact excavators. (Spanish)
Construction	635	Loader Remote Control Operator Training	Loader Remote Control Operator Training (English)
Construction	636	Skid Steer Loader Operator Training ENGLISH	The purpose of this course is to impart rules and practices for the safe operation of Bobcat® brand skid-steer loaders. (English)
Construction	637	Skid Steer Loader Operator Training SPANISH	The purpose of this course is to impart rules and practices for the safe operation of Bobcat® brand skid-steer loaders. (Spanish)
Construction	638	Toolcat Utility Work Machine Operator Training ENGLISH	The purpose of this course is to provide the student with visual and hands-on demonstrations on safe and efficient operation of the Toolcat® Utility Work Machine. (Spanish)
Construction	639	VersaHANDLER TTC Operator Training ENGLISH	The purpose of this course is to impart rules and practices for the safe operation of the Bobcat VersaHandler® Telescoping Tool Carrier. (English)

Construction	640	Service Safety Training for Skid Steer Loaders	Safety DVD in English for anyone performing service or repairs on Bobcat skid steer loaders. (English)
Construction	641	Service Safety Training for Compact Excavators	Safety DVD for anyone performing repairs or service on Bobcat compact excavators. (English)
Construction	642	Bobcat Safety Videos	Bobcat Company has developed a new safety DVD that includes all of Bobcat's Safety Videos in both. Each of the programs are approximately 10 minutes long. Following is a list of the safety videos contained on the DVD: Skid-Steer Loader, All-Wheel Steer Loader, Compact Excavator, Loader Backhoe, Mini Loader, Toolcat Utility Work Machine, Utility Vehicle, VersaHANDLER TTC. (English & Spanish)
Construction	662	Front End Loader Safety	Based upon records of actual mining accidents, this video describes some of the fatalities and injuries that can occur in the use (and misuse) of front-end loaders. It analyzes these accidents, explains causes and preventive measures, and presents safe operating procedures for various work assignments. (English)
Construction	707	Four High Hazards DVD	This DVD covers fall hazards, struck-by & caught in-between, electrical. (English)
Construction	710	Confined Space in Construction	Shot on actual jobsites across the country, this DVD can be used as a toolbox talk or as a complement to confined space training. In addition to a description of what constitutes a "confined space," the topics covered include: Regulations and permits, Training, Atmospheric testing, PPE (including respirators), Ventilation methods, Physical hazards, Lockout/blockout/tagout, Emergency plans and much more. (English)
Construction	711	Clearing the Air: Confined Space in Construction	Confined spaces offer unique safety concerns. This DVD discusses the potential dangers of confined space entry and shows how to enter confined spaces safely. (English & Spanish).
Construction	712	Hand Signals for Construction Equipment English	Shows the SAE hand signals in use with various types of construction equipment. (English)
Construction	713	Hand Signals for Construction Equipment Spanish	Shows the SAE hand signals in use with various types of construction equipment. (Spanish)
Construction	718	Construction Soft Tissue Injury Prevention (Ergonomics)	This DVD focuses on why soft tissue injuries occur and high-lights effective methods to reduce the number of soft-tissue injuries. (English and Spanish)
Construction	719	Safety During Renovation & Demolition Operations	This DVD provides practical guidance ensuring employee (and public) safety during demolition and renovation operations (non-structural work). It addresses high-frequency/exposure hazards, and includes information on controlling moisture and dust hazards. (English)
Construction	731	Roadway Safety: A Construction Industry Consortium Training Program	This covers runovers, operators, flaggers, noise, struck by, night work, excavation, electrical, sprains, falls, health, emergency, safe driving. (English)
Construction	736	Construction Stairways and Ladders – The First Step	In construction, the risks are high and safety standards must not come crashing down. Before your employees step on that stairway or ladder, they must review the crucial safety precautions in this program. (English)
Construction	788	Respirable Crystalline Silica for Construction (NEW 2016)	Workplace Illness takes the lives of thousands of workers each year. Approximately 2.3 million workers are exposed to crystalline silica and OSHA estimates about 40% of these workers are exposed to silica levels that exceed the currently permissible exposure levels. This training program will look at key points of the OSHA standard regarding respirable crystalline silica and help you protect yourself from the hazards associated with it. (English)
Construction	3001	Seven-Minute Solutions for Construction	Fall protection, back safety, electrical safety, hand and power tool safety, PPE, stairways and ladders. Real-world experience with each topic. A quick review and summary. (English)
Construction - Cranes	378	Crane Safety	Low-cost, effective safety training for crane operators. A companion to the Crane Safety Manual, the video discusses operator preparation, pre-operation equipment inspection, safe crane operation, rigging, hand signals, and more. (English)
Construction - Cranes	391	Working Cranes near Power Lines	Starting with the pre-lift meeting, the viewer is taken through the procedures necessary to avoid the lethal results that often occur when cranes contact power lines. A personal account of a worker who lost three limbs when his crane contacted a power line will leave the viewer emotionally charged to do the things necessary to avoid contact. (English)
Construction - Cranes	714	Rigging and Lifting with Mobile Construction Equipment	Practical advice and real-world cautions on how to do on-site lifting jobs safely. Video includes analyzing the load, determining proper rigging, adjusting for the center of gravity and the effects of various types of hitches. (English)
Construction - Cranes	3006	Certified Crane Operator Certification Program & Practical Exam	13-minute video leads you step-by-step through the entire CCO Practical exam. Each task is explained in detail, along with an explanation of the scoring process and test day administration. Comes complete with one copy each of the Candidate Handbook and Test Site Coordinator Handbook. (English)
Construction - Cranes	3007	Rigging Safety	MARCOM's training products on "Rigging Safety" point out to employees that over 90% of rigging-related accidents are caused by human error, and that they are the key to preventing these incidents. (English & Spanish)
Construction - Forklift Safety	103	Skytrak EMI – Operator Safety	Skytrak rough terrain forklift operator safety DVD (English)
Construction - Forklift Safety	420	SkyTrak Severe Conditions	Covers safe operation of SkyTrak forklifts in rough conditions, rough terrain, and hills. (English)
Construction - Forklift Safety	421	SkyTrak Operator Safety	Skytrak rough terrain forklift operator safety DVD (English)
Construction - Forklift Safety	422	Lull Operator Safety	Lull off-road forklift operator safety DVD. (English)
Construction - Forklift Safety	423	Telehandler Operator Orientation	Telehandler – off road forklift safety DVD. (English)
Construction - Forklift Safety	457	Forklift Fundamentals: Get the Facts	This program will familiarize your workers with the basics of safe forklift practices and will help your company comply with OSHA's Powered Industrial Truck Standard (English)
Construction - Insulation	300	Play it Smart, Play it Safe	This DVD is designed to provide important information in a fun and entertaining way to contractors and workers who handle fiberglass, rock and slag wool (synthetic vitreous fiber) insulation products. (English & Spanish).
Construction - Roofing	404	Safety Awareness – It's up to You: Setting up the Jobsite Safely / Water Damage – Don't get soaked!	Includes Safety Awareness: It's Up to You and Setting Up a Job Site Safely in English and Spanish and the English version of Water Damage: Don't Get Soaked. (English & Spanish)
Construction - Roofing	405	Night Time Roofing Work: Electrical Safety / Sheet Metal Safety Tips	This DVD uncovers electrical hazards confronting your roofing crews, including power lines, GFCIs, extension cords, power tools and other hidden hazards. (English & Spanish)
Construction - Roofing	406	Introduction to Safety	The program covers personal protective equipment, fall protection, and materials and equipment handling plus some common safety concerns, such as fire safety and burns from hot bitumen. (English & Spanish)
Construction - Roofing	407	Fire Safety: Don't Get Burned: Hot Times: Torch Safety / Kettle and Tanker Inspection & Maintenance	Includes Fire Safety: Don't Get Burned, Hot Times: An NRCA Review of Torch Safety Essentials and Your Down and Dirty Guide to Kettle and Tanker Inspection and Maintenance. (English & Spanish)
Construction - Steel Erection	723	Fall Hazards Training Module	The Fall Hazards training module defines OSHA 1926.761 (b) of the 2002 steel erection standard. (English & Spanish)
Construction - Steel Erection	724	Controlled Deck Zone Training Module	The Controlled Deck Zone (CDZ) training module defines OSHA 1926.761 (c) (3) of the 2002 steel erection standard. (English & Spanish)
Construction - Steel Erection	725	Multiple Lift Rigging Training Module	The Multiple Lift Rigging training module defines OSHA 1926.761 (c)(1) of the 2002 steel erection standard. (English & Spanish)
Construction - Steel Erection	726	Connector Training Module	The Connecting training module defines OSHA 1926.761 (c) (2) of the 2002 steel erection standard. (English & Spanish)
Construction - Trenching & Excavation	393	Trenching and Shoring Operations	Meets training requirements for those persons assigned the job of trenching and shoring. Explains the safety rules, requirements, procedures and emergency procedures. (English)

Construction - Trenching & Excavation	453	Cave In! Trenching & Shoring Safety	Of the numerous trench construction accidents, 400 are deaths and 6,400 are severe injuries. Give your workers a deep understanding of trench hazards and an even deeper know-how to prevent cave-ins with this best-selling training program. It supports your compliance efforts concerning OSHA 1926.650-652. (English, Spanish, Portuguese)
Construction - Trenching & Excavation	454	Trench Emergency	Dangers run deep in trench construction. Review the do's and don'ts of the job and save your employees' lives and those of their rescuers. (English, Spanish, Portuguese)
Construction - Trenching & Excavation	487	Missouri One Call System	Facts about underground utilities and how to get a "dig rite." (English)
Construction - Trenching & Excavation	715	Excavation Safety Orientation	This interactive, pictorial-based training DVD teaches workers how to recognize safety and health hazards when working in and around excavations and trenches and how to protect themselves and others from hazards. This program is ideal for use by employers as an introduction to excavation and trench safety for new employees and for workers reassigned to excavation and trenching operations. Produced in English and Spanish for both audio track and visual text, it presents excavation safety in a manner that permits learning comprehension by workers with limited education or reading skills. Please note: DVD only works on a PC with a DVD drive
Construction - Trenching & Excavation	730	Excavation and Trenching	The Construction Institute offers complimentary Excavation and Trenching Safety DVD, produced under OSHA Susan Harwood Training Grant.
Construction - Trenching & Excavation	748	The 5 Steps to Safer Digging Toolbox	In this engaging and informative safety video, we hear from those in the field and explore the challenges of today's digging landscape through explanation of the five essential steps to safer digging.
Construction - Trenching & Excavation	772	DPRESS Simulated Trench Rescue Event (Copy 1)	<a href="http://mocommonground.org/multimedia/videos/">http://mocommonground.org/multimedia/videos/</a>  <u>This video is a demonstration of the rescue that occurs when workers are buried alive. Nationally renowned Missouri Task Force 1 walks through the steps to recover trench collapse victims.</u>
Driving Safety	301	Keeping Your Eye on the Ball: Position Awareness over the Road	Position awareness over the road. (English) For heavy truck / ready mix drivers.
Driving Safety	302	Driver Wellness CD-ROM	Over 50% of all injuries in the RMC environment occur as sprains and strains. These soft tissue injuries occur in the lower and upper back, the shoulder, the knee, the ankle, and other parts of the body. The PowerPoint presentation on this CD-rom highlights the most common injuries and describes flexibility and strengthening exercises for drivers and others that help reduce these injuries. The presentation also includes habits to promote a healthy lifestyle.
Driving Safety	303	In the Blink of an Eye: Safety around Your Ready Mix Truck and Chutes	This video lesson identifies four hazard areas around a ready mix truck and chutes. (English)
Driving Safety	304	As The Wheel Turns Ep. 1: Overview and Anatomy of a Tire	Overview and Anatomy of a Tire. (English)
Driving Safety	305	As The Wheel Turns Ep. 2: Tire Inspection & Maintenance	Tire inspection and maintenance. (English)
Driving Safety	306	As The Wheel Turns Ep. 2 1/2: Tire Inspection & Maintenance	Tire inspection and maintenance. (English)
Driving Safety	307	As The Wheel Turns Ep. 3: Tire & Wheel Guidelines for Construction Vehicles	Tire & wheel guidelines for construction vehicles. (English)
Driving Safety	308	As the Wheel Turns Ep. 4: Tire Operational Issues	Tire Operational Issues. (English)
Driving Safety	309	Buckle Up and Live: Seat Belt Facts for Drivers & Operators	This video centers on laws and regulations concerning seat belts on trucks, equipment and automobiles. Laws of physics detail the effects of a collision on the human body, including footage from the Insurance Institute for Highway Safety depicting crash dummies in a low speed collision as well as a rollover demonstration conducted by Volvo Trucks that highlights what happens to individuals who are not belted in. The video also cites the FMCSA and MSHA regulations as they pertain to drivers and operators. (English)
Driving Safety	310	Keeping the Shiny Side Up! Parts 1 and 2	In our business the term "rollover" elicits images of damage, bodily injury and major costs. In part one of this two part series we take a critical look at the contributing factors leading to a ready mix truck rolling over while maneuvering on the road. Based on this information we provide specific steps a concrete delivery professional should practice everyday to avoid a roll over, and minimize personal injuries if a rollover occurs. Part two of this series focuses on preventing a rollover in off-road and job site situations. Again we begin by exploring the contributing factors and visually illustrating potential rollover circumstances deliver professionals may encounter while driving a mixer off road and on job sites. The lesson provides step-by-step procedures relevant to operating on side hills and open excavations as well as reviewing the steps that need to be taken to prevent or minimize injuries in the event of a rollover.
Driving Safety	311	Keeping the Shiny Side Up!	In our business the term "rollover" elicits images of damage, bodily injury and major costs. In part one of this two part series we take a critical look at the contributing factors leading to a ready mix truck rolling over while maneuvering on the road. Based on this information we provide specific steps a concrete delivery professional should practice everyday to avoid a roll over, and minimize personal injuries if a rollover occurs. Part two of this series focuses on preventing a rollover in off-road and job site situations. Again we begin by exploring the contributing factors and visually illustrating potential rollover circumstances deliver professionals may encounter while driving a mixer off road and on job sites. The lesson provides step-by-step procedures relevant to operating on side hills and open excavations as well as reviewing the steps that need to be taken to prevent or minimize injuries in the event of a rollover.
Driving Safety	312	Back the Truck Up: Backing Up Safely on Construction Sites	Is designed to help stem the rising tide of backing accidents. The video begins with the demonstration of an effective jobsite survey focused on securing each of the seven zones identified within a truck's "Sphere of Safety." From their, the lesson moves on to providing your learners with a series of step-by-step procedures designed specifically to help our Concrete Delivery Professionals safely do what they spend so much time doing; backing their trucks up. (English)
Driving Safety	333	NSC Distracted Driving: A Deadly Distraction	Cell phone distracted driving is a serious safety threat to all motorists. This video discusses the cell phone use epidemic, why hands-free devices are not a safer option and what it will take to get drivers to put down their phones. (English)
Driving Safety	352	Driving in the Rain	Reduced visibility and slippery roads can make driving in the rain hazardous. Even in a light drizzle, driving conditions can be downright dangerous. To maintain control of your vehicle, it's important to take preventative measures. Tone: Actuality / Language: English Key training points: Safe driving strategies - Skidding - Hydroplaning - Flooded roadways - Vehicle maintenance
Driving Safety	361	Driver Safety Begins with Attitude	Your attitude will affect your driving. If you are hurried, distracted or angry, you could be a serious safety threat on the road. Improve your driving skills - and your odds of arriving at your destination safely - by letting go of negative emotions when you get behind the wheel. (English)
Driving Safety	385	Vehicle Safety (Driving on the Road)	This video is designed for anyone operating a vehicle on the road. Emphasizes the need for wearing seat belts, driving defensively, rules of the road and general safety awareness when operating a motor vehicle.
Driving Safety	386	Vehicle Operation Safety	Designed for individuals operating any type of farm equipment or vehicle. Covers basic safe driving rules.
Driving Safety	442	Defensive Driving: 15 Passenger Vans	Fatal rollovers and other accidents involving 15-passenger vans occur because the drivers are inexperienced and untrained. This valuable program will provide your drivers with important safety tips to help them operate the vans safely, protect passengers and avoid accidents. (English, Spanish)
Driving Safety	443	Defensive Driving: A Crash Course	Motor vehicle crashes consistently account for a huge number of injuries and lost work days. Keep your employees safe behind the wheel, on the job and off. Give them the tips they need to become defensive drivers and avoid costly accidents. (English, Spanish, Portuguese)
Driving Safety	444	Defensive Driving: Prepared for the Worst	Defensive drivers anticipate how to deal with road hazards, poor weather conditions, vehicle collisions and crime. This program shows how to stay in control by being prepared for the worst! (English, Spanish, Portuguese)

Driving Safety	446	Safe Winter Driving	Winter driving presents special driving hazards. This program reviews special safety techniques to help employees overcome winter driving hazards. Keep your workers safe on the road this winter. (English, Spanish)
Driving Safety	518	Pre-Trip Inspection for Light Duty Trucks	Excellent training program to drivers of light trucks how to inspect the vehicle before the shift as well as during and after the shift. What operational checks are required to help vehicles in serviceable condition. (English)
Driving Safety	522	Coaching the Beginning Driver	However well-intentioned, most parents are unsure of the best way to "coach" their new driver (what techniques should be emphasized, when and how to offer advice, etc.) and would welcome help in raising their teenagers' driver safety awareness. With this innovative program, young drivers can take the next step past the basics to real defensive driving.
Driving Safety	523	Road Rage: How to Protect Yourself	Suitable for all drivers, this 15-minute video covers the rationale for keeping cool, calm, and safe in today's stressful and potentially dangerous driving environment. The presentation offers practical tips for building a "Road Rage " defense... including how to control one's own anger while driving and how to avoid becoming a victim of other drivers' road rage. (English)
Driving Safety	524	Backing Safely	Backing is the cause of a large number of collisions — a disproportionate number — since drivers spend a relatively small amount of time actually backing. And, although speeds are normally low, these collisions not only create inconveniences, they cause significant property damage and even personal injury. (English)
Driving Safety	525	Parking Safely	There is more to parking a vehicle than simply pulling into a space, turning off the ignition and closing the door behind you. In fact, parking can be just as hazardous as driving in traffic, since many drivers and pedestrians disregard all normal traffic laws once they arrive in a parking area. Parking Safely is designed to refresh even experienced drivers' safe parking skills. (English)
Driving Safety	527	Reduce Your Risk	Whether on business or after hours — in or out of town — your employees should follow basic safety procedures to prevent carjackings, car theft, muggings, and other vehicle-related crimes. The Reduce Your Risk™ video features personal safety techniques your employees and their families can use to guard against crime. (English)
Driving Safety	528	Low Visibility Driving	Low Visibility & Driving™ presents preventive measures and corrective actions to improve a driver's ability to see and be seen when conditions are not ideal. (English)
Driving Safety	538	Vehicle Safety Inspection	This point-by-point inspection program will show young drivers how to make sure that the vehicles they drive are as safe and reliable as they should be.
Driving Safety	581	5 KEYS TO SAFE DRIVING FOR LARGE VEHICLES	An excellent program designed to illustrate safe driving techniques for large delivery or other vehicles. Covers the five keys to safe driving. A must sees for any employee who operates a large vehicle.
Driving Safety	582	Trucking Safety Orientation	Meets OSHA requirements for training employees in exposed general hazards. Addresses footwear, clothing, personal protection, lifting safely, material handling, forklift safety, and general safety requirements in a terminal distribution center. (English)
Driving Safety	752	Off-Road Recovery	Short video which gives quick tips on how to safely take corrective measures if you find yourself going off-road in your vehicle.
Driving Safety	3002	Basic Training (driver training kit)	Backing Training Kit - Addresses common back maneuvers drivers must know how to perform, including straight-line backing, alley dock backing, parallel parking, and blind-side backing. Vehicle Inspections Training Kit - Takes drivers through a seven-step inspection process and stresses the importance of checking things in the same order every time. Speed & Space Management Training Kit - Gives your drivers solid information on the proper control of speed and "safe space" maintenance. Accidents & Breakdowns Training Kit - Helps your drivers learn the proper procedures to follow after an accident or breakdown.
Driving Safety - Snow Plow	529	Snow Plow Safety: Parking Lots	The Snowplow Safety: Parking Lots™ video focuses on specific safety issues regarding the plowing of parking lots. The video can be used for self-directed or classroom study, and is ideal for pre-and in-season training. (English)
Driving Safety - Snow Plow	530	Snow Plow Safety	Many snowplow training videos focus on the mechanics of operating different kinds of plows-use of an auger, spreader rates, when to plow, etc.-or on how to drive a truck, but few of them deal with collision issues... until the Snowplow Safety™ video was produced. Ideal for training newly hired snowplow operators or as a refresher for experienced operators-can be used in a classroom setting or as self-study. (English)
Driving Safety - Towing & Recovery	610	HATS of Incident Management	HATS of Incident Management and V-ID DVD - This DVD contains both HATS and the V-ID plus 5 V-ID card.
Driving Safety - Towing & Recovery	611	Everyone Goes Home	Everyone Goes Home DVD - A Roadside Safety DVD that every tower and company owner should see.
Driving Safety - Towing & Recovery	612	Dress for Success	Dress For Success DVD - A Roadside Safety DVD that describes the ANSI approved apparel every tower should wear for roadside safety
Driving Safety - Towing & Recovery	613	Towing – Light duty	TOWING - LIGHT DUTY DVD – TRAA & Univ. of GA Center for Continuing Education produced this light duty demonstration video covering: How Light Duty Wreckers Work / Field Procedures & Customer Service / Towing with a Conventional Tow Sling / Towing with a Wheel Lift; 5/Using a Tow Dolly / Recovery With Light duty Wreckers / Using Light Duty Carriers
Driving Safety - Towing & Recovery	614	Heavy Duty Towing	HEAVY DUTY 3-DVD SET - Deals with all aspects of heavy towing & recovery classroom instruction.
Emergency Preparedness	341	Chemical Spills Part 1 / Emergency Preparedness	Spills and leaks of hazardous chemicals can pose significant health and fire risks. Whenever you work with a substance, be aware of the hazards, and know what to do in the event of an emergency. Tone: Actuality / Language: English, Spanish Key Training Points: Chemical hazards - Emergency procedures - Spill control equipment - Personal Protective Equipment.
Emergency Preparedness	342	Chemical Spills Part 2 / Control Procedures	Whenever chemicals are in use, there is always the danger of an accidental spill or release. Generally, employees may clean up minor chemical spills. To ensure safety, however, employees must have proper training, personal protective equipment, and proper material to contain and absorb the spill. Tone: Actuality / Language: English, Spanish Key Training Points: Spill control materials and equipment - Containing, absorbing, and cleaning up chemical spills - Proper disposal - Spill prevention
Emergency Preparedness	349	Emergency Evacuations from Multi-Story Buildings	Emergency evacuations from multi-story buildings pose special hazards to occupants and visitors. Prepare yourself by knowing, in advance, procedures to follow in the event of a fire, bomb threat, significant chemical spill or other emergency that requires evacuation from buildings that are several stories tall or higher. (English)
Emergency Preparedness	350	Fire Extinguishers - Classification	When used properly, a portable fire extinguisher can save lives and property. However, if you use the wrong type of extinguisher, you can make the fire worse and endanger yourself. Read labels to determine safe and proper use before attempting to extinguish a fire. Tone: Drama / Language: English Key training points: Fire extinguisher ratings - Multi-class ratings - Extinguishing agents.
Emergency Preparedness	351	Fire Extinguishers – Safe Use	Fire extinguishers, when used properly, can help minimize personal and property damage if a fire occurs. However, fighting fires can be dangerous. Know when and how to use a fire extinguisher so that you don't endanger yourself or others or make the fire worse. (English)
Emergency Preparedness	357	Emergency Action Plans	Emergencies and disasters can strike anyone, anytime, anywhere. You and your co-workers could be forced to evacuate your workplace when you least expect it. Your company's emergency action plan gives you procedures to follow in the event of an emergency. Make sure you're familiar with this plan before an emergency occurs. Tone: Actuality / Language: English. Key Training Points - Reporting an emergency - Evacuation procedures - Employee roles and responsibilities - Accounting for employees after an emergency – Training.
Emergency Preparedness	395	Fire Extinguisher Training	This DVD explains fire extinguisher use and fire prevention methods for construction jobsites. (English)

Emergency Preparedness	449	Emergency Action Plan: Crisis Under Control	Disasters - natural or man-made - can occur anytime, and an Emergency Action Plan must always be at hand to help your employees respond to the situation. It is essential not only for OSHA compliance but also for survival and minimization of loss. Cook up a strategic emergency plan by following the guidelines in this program. (English, Spanish, Portuguese)
Emergency Preparedness	450	Emergency Evacuation: Getting Out Alive	In an emergency situation, survival hinges on adequate training, preparation and an emergency action plan. This program explains several emergency situation responses, the importance of drills and the principles of RACE. It prepares your employees to handle any disaster - natural or otherwise. (English, Spanish, Portuguese)
Emergency Preparedness	456	Fire Extinguishers: Your pass to safety	When fire breaks out, your workers only have seconds to respond. Every delay can be costly. Even fatal. Give your employees accurate and concise annual training on fire extinguisher use. (English, Spanish, Portuguese)
Emergency Preparedness	502	Emergency in Apex	Hazardous Waste Fire and Community Evacuation . DVD discusses the fire at the Apex chemical waste transfer station and the emergency response. (English)
Emergency Preparedness	504	Anatomy of a Disaster: Emergency at BP Oil Refinery Texas City, TX	Anatomy of a Disaster: Explosion at BP Texas City Refinery
Emergency Preparedness	757	Silent Storm: Intimate Partner Violence and Stalking - The Impact on the Workplace	Intimate partner violence is pervasive... affecting 1 in 4 women in this country. Recent reports indicate that intimate partner violence has already entrenched itself in every mid to moderate-size company at a cost of over \$4 billion per year in lost productivity, increased healthcare costs, and absenteeism. To help organizations manage this growing problem, the Center for Personal Protection and Safety is proud to announce the release of SILENT STORM, an instructional video training program designed to increase awareness of intimate partner violence and provide tools to increase safety in the workplace.
Emergency Preparedness	758	Silent Storm: Recognizing and Preventing Violence in the Workplace	Understand what workplace violence is. Recognize common myths about workplace violence. Recognize Behaviors of Concern <i>before</i> violence occurs. Recognize signs of Domestic Violence as it affects the workplace environment. Understand the importance of early action and options for responding to and reporting warning signs.
Emergency Preparedness	759	Shots Fired: Guidance for Surviving an Active Shooter Situation	Understand what workplace violence is. Recognize common myths about workplace violence. Recognize Behaviors of Concern <i>before</i> violence occurs. Recognize signs of Domestic Violence as it affects the workplace environment. Understand the importance of early action and options for responding to and reporting warning signs
Emergency Preparedness	760	Advanced Fire Extinguisher Training (Short Version)	Not everyone understands or knows how to use fire extinguishers. There are different extinguishers for each type of fire. The object of fire extinguisher training is to save lives. This program will provide information and help become familiar with extinguishers, fire prevention and understanding an emergency action in the event of a fire.
Emergency Preparedness	761	Advanced Fire Extinguisher Training (Long Version)	Topics covered in this safety video include: inspections, retaining inspection records, the purpose of the pin, what to do once an extinguisher has been used, checking for visible damage, extinguisher location, what to do if an extinguisher is used or found to be defective, the service tag, types of extinguishers, PASS, definition of combustion, the fire triangle, classes of fires and extinguisher, HALON extinguishers, tips on fire prevention including housekeeping, proper storing of flammable liquids, checking your equipment, and items that can ignite flammable vapors, safety containers for flammable liquids, bonding and grounding of flammable liquid containers, safety waste cans, fire prevention, proper use of extinguishers, danger of smoke, extinguishing the fire, and understanding extinguishing agents.
Emergency Preparedness	762	Emergency Preparedness at Work	Topics included in this safety video are: safety measures during the earthquake, people are the number one priority, training, Pre-Emergency Drills, exits, fire suppression equipment, "Duck, Cover, and Hold," aftershocks, entering or exiting damaged buildings, gas lines, downed power lines, telephones, water supplies, battery operated radios, vehicles, outdoor barbecues, hibachis, and camping stoves, shut off gas, home emergency supplies, isolation, and absence of emergency services.
Emergency Preparedness	763	Tornado and Earthquake Safety	Topics included in this safety video are: What is a tornado? What causes a tornado? Where do tornadoes occur? What kind of destruction do tornadoes cause? What to do during a tornado? Safety tips, after a tornado, consider your health, and safety issues.
Emergency Preparedness	767	Fire Extinguisher Safety	Use this course to educate your team on the fire triangle, the types of fires that can occur in the workplace, and how and when to use a fire extinguisher. This course also describes when to evacuate and provides some proper maintenance tips for fire extinguishers.
Emergency Preparedness	768	Emergency Action Plans	This course covers the importance of creating emergency action plans in preparation for unexpected emergencies, accidents, and evacuations at industrial workplaces. Based on OSHA standards and recognized industry best practices, this course is intended as an introduction or refresher for general industry workers and those responsible for developing an emergency action plan.
EMS	416	Highway Safety for Emergency Services	The increase in debilitating or fatal incidents involving emergency service and highway safety workers worldwide is on the rise. This program is part of an ongoing videotape series and offers proactive measures an ESO can implement to reduce the chances for death and injury of personnel operating at vehicle-related incidents on streets, roads, and highways. (English)
EMS	417	Intersections: Operation Safe Arrival	The second greatest number of accidents and the most severe accidents involving emergency vehicles occur at intersections. This DVD program includes interviews, a poster and a facilitator's guide, so your department can easily implement the program as in-service training for your personnel. (English)
EMS	418	Emergency Vehicle Rollover Prevention	Driver error is the major contributing factor in nearly all emergency vehicle rollover crashes. The DVD focuses on Physical Dynamics of Vehicle Operations, Mechanics of Vehicle Operations, Common Rollover Circumstances and Best Practices for Maintaining Vehicle Control. (English)
EMS	419	Privately Owned Vehicle Operations (POV)	Answering the Call Safely is designed to aid in the reduction of POV accidents. This program will also provide information for emergency service officers on how to provide proper training, and how to develop standard operating guidelines and other management tools to help reduce the risks associated with driving POVs. (English)
EMS	434	Back Safety: For First Responders	While your EMTs, firefighters and law enforcement officers take care of others, you have to take care of them. To keep them healthy, lean on these solid safety techniques and exercises to keep their back muscles strong and flexible. (English, Spanish, Portuguese)
EMS	448	Emergency Response Driving	There are risks when you're at the wheel, but when you're driving an emergency vehicle -- with lights and sirens blaring -- the risks multiply! This program shows what it means to drive during emergencies and includes neat tips to ensure that drivers reach their destinations - ON TIME, SMOOTHLY and SAFELY. (English, Spanish)
EMS	3003	CEVO 3 Ambulance (c KIT)	Coaching the Emergency Vehicle Operator 3 – Ambulance™ (CEVO 3-Ambulance) adapts our proven defensive driving techniques to the unique nature of ambulance work, training drivers in six- to eight-hours to navigate traffic safely in emergency and non-emergency situations.
EMS - Firefighter Safety	399	Flashover!	Flashover is both dramatic and deadly. Learn from Chief Dunn when flashover occurs and safety techniques that can prevent or delay this dangerous event. We've taken Dunn's classic video and reproduced it on DVD! Now you can use the latest technology for timeless fire ground training. (English)
EMS - Firefighter Safety	400	Firefighter Survival Techniques	Covers firefighter survival by the implementation of proper tactics in unison with proper staffing. Frank Ricci and other notable instructors from departments of all sizes cover 28 tactics grouped into four categories (Fire Attack, Self-Rescue, Rescuing a Brother and Safety Precautions). (English)
EMS - Firefighter Safety	401	And the Beat Goes On	Firefighters have got to stop killing themselves! They are heroic but do many non-heroic things that may result in injury and death. Deputy Chief Billy Goldfeder, Fire Engineering contributing editor and FDIC speaker, rallies the troops to fight smarter and safer by refusing to make common mistakes that can have fatal consequences – failing to wear a seatbelt, entering a building where there is no human life at risk, failing to drive safely, failing to wear SCBA and all protective gear at every call. (English)

EMS - Law Enforcement	364	Knoxville Officer Hit	A Knoxville (TN) officer is winding up special patrol at a busy area where local university students party well into the morning hours before the Saturday football game. She is struck by a car driven by a heavily intoxicated woman. (English)
EMS - Law Enforcement	365	Traffic Stops and Interdiction	Retired Maryland State Trooper Mike Lewis, now Sheriff of Wicomico County, Maryland, takes us step-by-step through effective interdiction stops, legal and officer safety considerations, and effective case documentation and presentation. (English)
EMS - Law Enforcement	366	Explosives Training for Street Officers	This is a must training addition for any law enforcement library. It includes complete explosives recognition training and information for street officers and dramatic video of two incidents in which one officer died and another was injured after approach. (English)
EMS - Law Enforcement	367	Bloodborne Pathogens	Every officer who is ever exposed to blood or other body fluids faces danger from bloodborne diseases including HIV, hepatitis C, agouts and many other diseases. The exposure can be deadly.
EMS - Law Enforcement	368	Jason Schechterle: Iron Will to Survive	Phoenix Officer Jason Schechterle was nearly burned when his cruiser was struck at 90 miles an hour by a taxi driven by an epileptic cab driver. Learn some of life's most important lessons for survival from this incredible Phoenix cop.
EMS - Law Enforcement	369	UT Officers Nearly Hit During Stop	The Utah officers were nearly wiped out during a snowy stop by an out of control vehicle.
EMS - Law Enforcement	535	Police Safety & Survival Volume 1	Law enforcement officers face potentially serious threats to their safety in every confrontation, from suspects who passively resist arrest to those intent on creating a life threatening situation by disarming an officer. In the Police Safety and Survival series, veteran law enforcement officers and training instructors Mark Wyler and Eric Murray teach the finer points of defusing potentially lethal situations with a variety of verbal, empty hand and weapons techniques. In Police Safety and Survival 1, the emphasis is on use of the kubaton, pressure point striking, handgun retention and handgun disarming. Learn to use hard and soft pressure point techniques against both active and passive resisters. Use the sympathetic nervous system to create involuntary reactions ranging from a creating distance or distracting a suspect or to momentarily disabling him. The second portion of the DVD covers retention of the handgun both in and out of the holster and disarming techniques in the event that a suspect gains control of the officer's handgun or if the unarmed officer finds himself facing a weapon at close range. English
EMS - Law Enforcement	536	Police Safety & Survival Volume 2	Law enforcement officers face potentially serious threats to their safety in every confrontation, from suspects who passively resist arrest to those intent on creating a life threatening situation by disarming an officer. In the Police Safety and Survival series, veteran law enforcement officers and training instructors Mark Wyler and Eric Murray teach the finer points of defusing potentially lethal situations with a variety of verbal, empty hand and weapons techniques. Police Safety and Survival 2 picks up where Volume 1 left off, covering the use of the expandable straight baton, the proper procedure for safely handcuffing a suspect, multiple officer control techniques and vehicle extraction. Instructor Mark Wyler begins by teaching the fundamental blocks, strikes, gripping methods, and combination strikes then progresses to baton retention, disarming, lock-ups and escorts. The next instructional segment covers the correct procedure for handcuffing and searching compliant and noncompliant suspects from the standing, kneeling and prone positions. The DVD wraps up with techniques for multiple officer control and vehicle extraction using empty hand techniques and the kubaton. Throughout both DVDs in this series the instructors share with you valuable life-saving safety tips gained from years on the job. While these DVDs are not meant to replace an officer's training, they offer many valuable supplemental techniques and strategies taught in a concise, no-nonsense format. English
Food Service	414	Knife Safety (Leader Kit Included)	Safely using knives is one of the most important skills in a kitchen. This video goes into the many safety rules that should be required of all employees that use knives. Proper personal protective equipment is discussed as well as information on how to care, store and maintain knives. (English)
Food Service	533	Basic Kitchen Safety	A kitchen can be a dangerous place. Learn how to avoid the most common kitchen accidents and be free of injuries. Be safe in the kitchen! (English)
Food Service	585	Employee Safety Orientation for Restaurant / Food Service - English	Meets OSHA requirements for safety orientation. Excellent for new and experienced employees. Trains employees in exposure to "general hazards." Includes basic safety, machinery, electrical safety, back injury prevention, slips and falls, cuts, burns, and employee safety responsibility. (English)
Food Service	586	Employee Safety Orientation for Restaurant / Food Service - Spanish	Meets OSHA requirements for safety orientation. Excellent for new and experienced employees. Trains employees in exposure to "general hazards." Includes basic safety, machinery, electrical safety, back injury prevention, slips and falls, cuts, burns, and employee safety responsibility. (Spanish)
Food Service	587	BUS PERSONS, DISHWASHERS AND JANITOR SAFETY TRAINING - English	Designed specifically for bus persons, dishwashers and janitorial workers. Includes cuts, burns, slips/falls, lifting safely, and procedures to reduce accidents and injuries. (English)
Food Service	588	SPANISH - BUS PERSONS, DISHWASHERS AND JANITOR SAFETY TRAINING	Designed specifically for bus persons, dishwashers and janitorial workers. Includes cuts, burns, slips/falls, lifting safely, and procedures to reduce accidents and injuries.
Food Service	589	Robbery and Employee Theft	Deals with restaurant security procedures, robbery prevention, how to handle a robbery, and facts about employee theft. Also covers employee theft deterrents, preventive measures, and straightforward talk about employee theft in restaurants. (English)
Food Service	750	Safety Orientation for Foodservice	This training program on "Safety Orientation for Foodservice" encourages employees to have a positive attitude about safety as well as provides introductory safety training on some of the most common workplace safety issues.
Garage / Repair Shop	488	Lifting It Right	Hosted by racing legends Richard & Kyle Petty, this 24-minute DVD is based on the ALI Safety Manual. (English)
Garage / Repair Shop	506	Workshop Safety: Auto Shop Safety	This program examines correct and safe procedures when working in an auto shop. It is designed for beginning high school students who have little or no experience in working in a shop environment. Set in actual high school shop conditions, Auto Shop clearly runs through potentially hazardous situations, and summarizes how to quickly and efficiently deal with them. Subjects Covered Include: Dressing for safety, Fire hazards and prevention, Jack usage, Power tool usage, Fumes and proper ventilation, The importance of housekeeping.
Garage / Repair Shop	507	Motor Fleet Maintenance Safety Training	Meets OSHA requirements for mechanic safety training. Addresses hazards associated with vehicle maintenance and repair. Explains basic tools, electrical hand tools, fire hazards, and more. (English)
Garage / Repair Shop	508	Employee Safety Orientation for Automobile Personnel	This video instructs new and experienced personnel in general hazards exposure in an automotive shop, such as clothing, tool safety, maintenance, eye protection, electricity, etc. Meets OSHA training requirements. (English)
Garage / Repair Shop	509	Hand and Power Tool Safety for Automotive Mechanics	Good introduction to hand and power tool safety. Explains procedure for tool safety, housekeeping, and other safety procedures.
Garage / Repair Shop	511	Fleet Shop Safety and Hazardous Materials	Addresses hazardous materials and safety issues common to the automotive shops. Specifically targets material safety data sheets, chemicals, asbestos, and safety procedures. (English)
Garage / Repair Shop	512	Chains, Slings and Hoists	Excellent program for anyone using overhead cranes/jib hoists. Discusses slings, lifting, angles, safety procedures, inspection procedures, and more. (English)
Garage / Repair Shop	513	SAFE USE, HANDLING, STORING, CHARGING, AND JUMP STARTING OF ACID BATTERIES AND SAFETY	This new, updated video explains fully and precisely what the title states. Basically everything you need to know about batteries, how they work, cleaning, maintenance, charging, personal protective equipment, and much more. Our older video (Jump-Starting) was simply how to jump-start a dead battery and the basics of how batteries work. This updated version is more in-depth and the information applies to the vehicle and forklift battery operations. Excellent program for anyone using, handling, storing, charging, and/or jump-starting batteries.
Garage / Repair Shop	514	Retail Tire Shop Safety Management	This video is great to use not only for service shop mechanics, but also for personnel who work inside the office. It highlights safety tips on slips and falls, hazardous materials, correct lifting procedures, and much more.

General Industry	327	Introduction to Safety: General Industry	Most accidents are caused by unsafe acts. To stay safe on the job, follow all safety rules and regulations. Learn to recognize the hazards in your workplace and take steps to avoid or control them. Tone: Dramatization / Language: English. Key Training Points: Common causes of accidents in the workplace - Hazard identification - Safety rules and regulations - Safe work practices.
General Industry	329	Machine Power: Mechanical Power Presses and Mechanical Power-Transmission Apparatus	Machine power drives industry. But it also poses hazards to workers. To ensure safety, the machine operator must respect the power of the machine as well as the source of the power. (English and Spanish)
General Industry	358	Five Steps to Ladder Safety	When used incorrectly, a ladder can be one of the most dangerous tools in the workplace. Prevent accidents by following basic steps for ladder safety. Tone - Actuality / Language - English Key Training Points: Choosing ladders - Ladder inspection - Set-up - Climbing and descending - Working from ladders.
General Industry	371	Box Cutter Safety	Box cutters should be renamed finger cutters because that is what they do in the hands of careless employees. This program explains how to properly cut boxes and prevent injuries.
General Industry	383	Safe Handling of Wood Pallets	Demonstrates proper method of handling wood pallets by warehouse persons. Includes proper stacking, storage, safe lifting, and more.
General Industry	392	Overhead Crane Safety	Inspection, operating practices, operator qualification requirements and when to lock-out and tag-out overhead cranes are thoroughly covered in this video. It uses a hands-on approach to provide practical safety instruction for those working with and around overhead cranes.
General Industry	424	Scissor Lift Safety	This DVD covers the safe inspection and use of scissor lifts. (English)
General Industry	425	Trailer Mounted Boom Lift	This DVD covers the safe inspection and use of trailer-mounted boom lifts. (English)
General Industry	427	Bucket Trucks: Extending Your Safety	Bucket trucks make working at high elevations easier but if they are not operated safely, major accidents can occur. Use this vital program to keep your bucket truck operators safe. (English, Spanish, Portuguese)
General Industry	441	Indoor Cranes: Safe Lifting Operations	This program is specifically designed for non-licensed operators to give them the knowledge they need to safely operate several types of cranes. (English, Spanish, Portuguese)
General Industry	460	Grounds Keeping Safety: Be a Pro!	As professional groundskeepers know, maintaining lawns, trees and shrubs requires potentially dangerous equipment and chemicals. Prune and refine your safety measures with this program. It explains how one can avoid unnecessary accidents by thinking: safe? Or sorry? (English and Spanish)
General Industry	482	Warehouse Safety: It's No Mystery	Warehouse hazards are plentiful and your safety standards must be thorough to deal with the problem. This program sets store on protective measures against the most common warehouse hazards. (English, Spanish, Portuguese)
General Industry	490	Lewis Safety Knives Demo CD-ROM	If you're interested in learning more about safety knives in general, take a look. (English)
General Industry	491	Power Pusher Material Mover	This DVD is a promotional DVD that shows PowerPushers at work moving heavy carts and loads. It's information for anyone in the grocery, warehouse or shipping industries. (English)
General Industry	501	Air Gun Safety	Air gun safety, noise as it relates to compressed air, flying chips, air velocity. Compressed air safety is discussed. (English)
General Industry	541	Danger! Scalding Lurks	Every year, thousands of people in the United States suffer serious thermal shock or scalding injuries in their bathtubs, sinks and showers. Learn more about these serious safety problems in this informative DVD hosted by plumbing expert Dave Yates of F.W. Behler Company. Learn about topics such as hot water stacking, how to protect individuals from scalding and thermal shock injuries, how to protect against the growth of Legionella bacteria in hot water systems and what new steps should be taken in the industry to eliminate these dangers. (English)
General Industry	542	Explosion! Danger Lurks!	Originally filmed in 1948, Explosion - Danger Lurks is a classic film depicting the dangers of water heaters left unprotected against high temperature and pressure situations. The film demonstrates the awesome power of unprotected water heaters through actual field tests performed by Watts Regulator. Explosion Danger Lurks stresses the importance of installing temperature and pressure relief valves to protect against these dangerous situations. (English)
General Industry	543	Watts Backflow Prevention Set	The Watts Backflow Prevention Set DVD includes informative videos on backflow prevention including: Spotlight On Backflow Prevention This video provides an overview of the concepts of protection and conservation of safe drinking water, selection of backflow devices and Watts manufacturing process. Backflow Prevention Maintenance and Repair - Small Diameter The video spotlights the repair and maintenance of small diameter backflow preventers, such as the Watts 007 and 009. Backflow Prevention Maintenance and Repair - Large Diameter The video spotlights the repair and maintenance of large diameter backflow preventers, such as the Watts 009, 909, 990 and 992.
General Industry	590	Manufacturing Employee Safety Orientation	Meets OSHA requirements for training all employees who are exposed to "general hazards." Includes basic requirements, electrical, mechanical, back injury prevention, fire prevention, fire protection, personal protective equipment, and more.
General Industry	607	Warehouse and Distribution Center Safety	Excellent for those employees working in a warehouse environment. Safe lifting, box cutter safety, material handling, personal protective equipment and general accident prevention techniques in the warehouse.
General Industry	616	Safety in the Die Casting Workplace	Safety in the Die Casting Workplace
General Industry	619	Screw conveyor, drag conveyor, and bucket elevator safety CD ROM	This instructional CD describes key safety practices people should adhere to when working with and around screw conveyors, drag conveyors, and bucket elevators.
General Industry	620	Safety Guidelines for Unit Handling Conveyors	CEMA A/V Number 4 "SAFETY GUIDELINES FOR UNIT HANDLING CONVEYORS" DVD - New and Revised in 2006. The 11 minute DVD provides 12 safety rules and lessons for safer operation and maintenance of unit handling conveyors. Industrial facility conveyors are the focus.
General Industry	626	Commercial Lawn Mower Safety	Just in time for the spring task of mowing lawns. We have great landscaping videos, but this rounds out the series explaining safety rules when using commercial mowers. (English)
General Industry	627	Tree Trimming Safety	(English) (18 min.) Demonstrates safety and maintenance methods for working with chain saws, chippers, high lift trucks, and general tree trimming safety.
General Industry	628	Water / Sewer Treatment Plant Safety	Treatment plants can be hazardous even though they are usually nice, clean places to work. Working with and around pumps, electricity, laboratories, and chemicals require special training. This video explains the special safety concerns of operators, technicians, and maintenance personnel. (English)
General Industry	646	Caution: Foundry At Work (DVD - January 1998)	This program describes occupational safety and health factors related to foundry work. (English)
General Industry	706	Chlorine Safety for Water and Wastewater Operators (DVD)	DVD covers key safety procedures on packaged chlorine handling for water and wastewater operators. It also has some information relevant to larger container users. The video is designed to be used in conjunction with Pamhlet #155.
General Industry	727	Don't Fall For It!	For an injury prevention campaign, mixes interviews with survivors of falls from ladders (or victims' survivors) with information about safe procedures. (English and Spanish)
General Industry	735	Modular Home Installation Safety Training	This DVD is essential for anyone building, transporting or setting up modular homes on site. A quick way to get great safety information to employees.
General Industry	787	Respirable Crystalline Silica (NEW 2016)	Workplace Illness takes the lives of thousands of workers each year. Approximately 2.3 million workers are exposed to crystalline silica and OSHA estimates about 40% of these workers are exposed to silica levels that exceed the currently permissible exposure levels. This training program will look at key points of the OSHA standard regarding respirable crystalline silica and help you protect yourself from the hazards associated with it. (English)
General Industry	794	General Safety Orientation (NEW 2014)	Many standards promulgated by the Occupational Safety and Health Administration (OSHA) explicitly require the employer to train employees in the safety and health aspects of their jobs. This program covers a general safety orientation for employees. (English)

General Industry - Forklift	396	Large Capacity Forklifts: Lumber Yard	This video combines the tips and experiences of real lumberyard operators with practical safety advice. Real accidents highlighted, Pedestrian and equipment traffic, Design and operating capabilities, Center of Gravity & safe load transport Night operations & working on slopes. (English)
General Industry - Forklift	397	Forklift Operator Training	Designed for employees responsible for operating forklift equipment in a foundry or other industrial settings. Explains forklift engineering principles, safe operating rules, forklift maintenance, and more. (English & Spanish)
General Industry - Forklift	459	Working Around Forklifts: A Pro-Active Approach	Always behave as if an accident might happen... this is the key to working safely around forklifts. This program helps motivate employees to take this lesson to heart and explains how and why special precautions are necessary. (English and Spanish)
General Industry - Forklift	791	Forklift Operator Safety Training (NEW 2011)	This program will cover all required OSHA training material including: The contents of the OSHA standard, types and characteristics of forklifts, preoperational inspections, basic driving, stability, load handling, fuels, batteries, and attachments. (English)
Health Care	413	Needle stick Prevention	Needle stick injuries still continue to be a problem for anyone using needles or sharp objects in the performance of their duties. This video covers the OSHA standards to help reduce this needle stick problem. (English and Spanish)
Health Care	430	Infection Control in Home Health Care	Home care workers can protect themselves and their patients from the spread of infection through work practice controls, housekeeping and laundry. (English and Spanish)
Health Care	451	Ergonomics: Safe Patient Transfer	Back protection when working with patients, risky tasks, risky patients and locations, mechanical lifting aids. (English, Spanish, Portuguese)
Health Care	464	Health Care Violence	Spot potential violence, how to defuse a hostile situation, areas most susceptible to violence, reasons for increases in violence, when to apply physical and chemical restraints, how to deal with the aftermath of an attack. (English and Spanish)
Health Care	466	Safety Orientation in Long Term Care	This DVD covers slips, trips and falls, electrical and fire hazards, basics of bloodborne pathogens, disinfection, and sterilization. (English and Spanish)
Health Care	467	Work Safely: Safety Orientation for Ambulatory Care	This DVD covers slips, trips and falls, back injuries, electrical hazards, fire, infections, chemical hazards. (English and Spanish)
Health Care	468	Tuberculosis: Identification and Control	This DVD focuses on the understanding, training and infection control procedures related to tuberculosis. (English and Spanish)
Health Care	469	Violence in Home Health Care	This DVD discusses the problem of violence, the assault cycle, pre-visit safety practices, and making safety a priority. (English, Spanish, Portuguese)
Health Care	591	Safety Orientation for Healthcare Administration	Provides basic safety orientation information relating to office and administrative personnel. Includes safe lifting techniques, electric safety, video display terminal safety and other related safety information. Also exposes administrative personnel to needle stick prevention and infection control information. (English)
Health Care	592	Safety Orientation for Healthcare Custodians	Provides basic safety orientation information relating to custodians/Janitors. Includes safe lifting techniques, electrical safety, chemicals and hazardous materials, needle stick prevention and infection control procedures. (English)
Health Care	593	Safety Orientation for Nurses	Provides basic safety orientation information to nurses and medical assistants. Includes safe lifting techniques, needle stick prevention, basic infection control procedures, electrical safety and other important topics.
Health Care	647	TB Respiratory Protection	These two programs are designed to educate health care workers on proper respiratory protection.
Health Care	749	Safety Orientation for Healthcare	In the healthcare field employees are the most important part of any safety program. You may come across unique and possibly fatal hazards everyday. This program will show you how to protect yourself from some of the most common hazards.
Health Care	751	Lifting Patients From Beds	Topics included in this safety video are: structure of your back, discs, cervical curve, thoracic curve, lumbar curve, body mechanics, draw-sheets, slide boards, trapeze, frail patients, obese patients, patients with casts, patients in traction, special needs patients, pulling a patient up in bed, turning a patient over in bed, and moving a patient from a bed to a gurney. (English)
Health Care	773	Manage Agression in the Clinical Setting	Watch this recording and learn how to protect yourself from dangerous situations in your office. How to read aggressive clients, recognize signs of escalation and gives you the tools to verbally de-escalate. This will help you create a plan for escape and provide proven strategies to avoid physical assault. Simple, yet effective physical responses to repel an attack.
Health Care	781	Healthcare Violence: Be Part of the Cure	This video re-enforces your facility's procedures and tells healthcare workers how to prevent violence and protect themselves from violent patients. The program focuses on the <i>before</i> (seeing the warning signs), <i>during</i> (staying safe and, if possible, diffusing the situation), and <i>after</i> (coping with residue stress) stages of any violent attack.
Health Care	3005	Fire Prevention in Healthcare Facilities	This training product on "Fire Prevention in Healthcare Facilities" look at how fires start, review steps that can be taken to help prevent fires and discuss what employees should do in case of a fire emergency. (English)
Hotel	372	Laundry Room Safety	There are many safety considerations in a laundry facility such as machine guarding, safe lifting, heat-related concerns and others. Provides laundry workers with a basic overview of their safety responsibilities.
Hotel	374	Housekeeping Safety	Instructs the housekeeping employees in specific safety hazards. Included are cleaning techniques, chemical use, back injury prevention, and more. The housekeeping department in most hotels has the most challenges with employee injuries. This safety training video is geared towards housekeepers to help alleviate costly workplace injuries. (English)
Hotel	375	Hotel Employee Safety Orientation	All employees must be made aware of exposure to "general hazards." Includes basic requirements, electrical, mechanical, back injury prevention, fire protection, personal equipment, and more. (English)
Hotel	472	Hotel Safety: A Reality Check-In	In a hotel, there can be no room for accidents. So when your employees "check in," they have to be well protected.
Mining / Quarry	648	Blast Area Security	The objective of this video and interactive DVD is to improve blast safety by providing information about blast area security to those working around blast sites.
Mining / Quarry	649	Blasters' Training for Independent Contractors	Designed to train independent contractors in the safe use and application of explosives. The DVD covers the following topics: Safety in Blasting, Buckle Up on the Job, Ground Control in Surface Mining (Coal), Surface Blasting in Metal and Nonmetal Mines, Quarry Safety, Safety in Surface Coal Mining, and Hazard Recognition and Avoidance in Surface Coal Mining.
Mining / Quarry	650	Accident Reduction Program/Post Accident Remedies, Technical Support (C/MNM)	This series consists of videos offering ways to prevent accidents before they happen. Technical Support conducts field investigations, laboratory studies, and analyses to resolve specific problems. MSHA is developing this video series in an attempt to help us learn from past accidents.
Mining / Quarry	651	Blind Spots Can Kill	A haul truck driver and an electrician discuss the accident where a 240-ton haul truck drove over the electrician's work vehicle. No one was in the vehicle, but the electrician's one-ton truck was destroyed. This video stresses the importance of getting the driver's attention whenever you're near a large haul truck and avoid getting into a blind spot.
Mining / Quarry	652	The Choice is Yours!	Larger equipment is being used in the mining industry and visibility from the operator's compartment is not always good. Numerous accidents have occurred where a miner was struck by or run over by underground mobile equipment. It takes no extra effort to wear your hi-visibility and reflective gear. There is no excuse not to do it – THE CHOICE IS YOURS! (English)
Mining / Quarry	653	Hazard Communication (MSHA)	Hazard Communication videotape programs, a brief interactive quiz, and a detailed in-depth look at MSHA's HazCom Standard. The material provides a broad look at properties and potential safety and health hazards of substances to which employees may be exposed. (English)
Mining / Quarry	654	Contributions of the American Miner (MSHA)	This video shows a wide variety of mining processes and the products that are produced from them. This is a great tribute to the hardworking men and women of our Nation's mines. (English)

Mining / Quarry	655	Diesel Powered Vehicles	Covers various topics concerning Diesel Powered Vehicles. The topics include the final phase of the diesel regulations, Sections 75.1909, 75.1910, and 75.1911 of the Code of Federal Regulations, as well as adjusting and maintaining a diesel-powered engine, and defining what is an approved diesel-powered engine. We will also take a look at how a fire suppression system works.
Mining / Quarry	656	Customer and Delivery Truck Drivers Hazard Training	This video provides hazard information for truckers who frequent mine sites. Covered are safe work behaviors that will help truck drivers avoid the dangers of ground, electrical, transportation, slip and fall, and numerous other hazards that are common in and around mine sites. (English and Spanish)
Mining / Quarry	657	Dump Point Safety: Stock Piles and Waste Piles	Using trucks to dispose of waste material and build stockpiles are important parts of many mining operations, but accidents can occur during these activities if adequate safety precautions are not taken. This video will illustrate the most common hazards at dumps and piles and will demonstrate recommended safety practices (English and Spanish)
Mining / Quarry	658	Equipment Guarding	Explores equipment guarding in-depth. It discusses types of guards, guard construction, qualities, materials, attachment, and applications of new technology, with an emphasis on hazard analysis and risk assessment. A variety of mining equipment is shown with guards of all types and qualities.
Mining / Quarry	659	Explosives Underground – Handling Explosives in Modern Mines	This video emphasizes safety standards for the handling and transportation of explosive materials from surface to underground. It shows underground storage of explosives, inspecting vehicles required to transport explosives underground, examining work places and scaling procedures, and loading and detonating explosives. It also includes staged safety violations and a review of an underground blasting accident. (English)
Mining / Quarry	661	The Fire at Dotiki	This video describes an underground coal fire, the actions of the miners, the efforts of management, and the assistance and experience of the Mine Safety and Health Administration. The video reviews the relationship between management and government to reach a common goal. (English)
Mining / Quarry	663	Harvey Roles I	This video is a hazard recognition and first aid training video. The video uses a classic contrast of a competent and incompetent response by two fellow workers to teach the proper procedures for securing an accident scene, applying first aid principles, and engaging the Emergency Medical System (EMS). (English)
Mining / Quarry	664	Harvey Roles II	This video is a first aid training video featuring a review of the fundamentals of rescue techniques following an electrocution. It reviews the proper procedure for rescuing a miner who has contacted an energized circuit, and demonstrates how to administer CPR. (English)
Mining / Quarry	665	Haul Roads and Dump Sites	Contains discussion topics, photos, best practice and safety tips, standards and policy (30 CFR Parts 56 and 77), and an interactive test designed to reinforce learning. (English)
Mining / Quarry	666	Hazards and Safety Practices on Surge Piles (MSHA)	This video is designed to make dozer operators, miners, and others who work on or around surge piles aware of the hazards associated with surge piles and inform them of the recommended safety practices. (English and Spanish)
Mining / Quarry	667	Health and Safety Hazard Awareness, An Overview – Gypsum Mining (MSHA)	This video is an overview of the basics of health and safety hazard recognition of many of the operations at a mine site. Your mine's education and training program will cover many of these topics in much more detail and inform you of specific policies at your mine. (English and Spanish)
Mining / Quarry	668	Hearing Conservation, MSHA's Part 62	Noise is a hazard that can diminish or destroy your hearing. This video shows the different hearing protectors available and the proper way to wear them. (English and Spanish)
Mining / Quarry	669	Hidden Danger: Safety Improvements for Surge Piles ©	Pushing coal on a surge pile has been called the most dangerous job at a prep plant. Several miners have lost their lives in surge pile accidents and there have been many other close calls. This video will show two ways to protect equipment operators from this danger. (English and Spanish)
Mining / Quarry	670	Highwall Hazards	In this you will have the opportunity to learn about the dangers of working near highwalls. It will teach you how to properly examine highwalls and how to recognize the hazards that are associated with them. We will also take a look at the importance of wearing fall protection while working on top of highwalls. (English)
Mining / Quarry	671	It Can Happen to You	Even with all required roof protection in place, roof falls still can happen. This video stresses the importance of always being aware of your work environment and the ever-changing conditions. (English and Spanish)
Mining / Quarry	672	A Little Song about Noise	Jerry Metcalf, a state of Montana inspector, talks about noise, vibrations and decibels and related mining situations. (English)
Mining / Quarry	673	Lock Out and Tag for Safety	This video describes the proper procedures for performing safe electrical lockout and testing, and dramatically illustrates what can happen if this isn't done. Job safety training and following company safety policies are stressed as a means for preventing such electrical accidents. (English)
Mining / Quarry	674	Make It Safer with Roof Screen	This 7-minute NIOSH video shows how well screen keeps loose rock from falling in difficult roof conditions. The video provides safe handling tips, best practices, and information about machine technology that can greatly improve material handling. It presents compelling data from mines that have practically eliminated rock fall injuries with a roof screening program. (English)
Mining / Quarry	675	"Reflections" Mining History	Shows the evolution of health and safety laws and the role of the supervisor. (English)
Mining / Quarry	676	Precious Metals Refining	This DVD addresses some safety issues of precious metals refining. Mercury is in our ore. When we recover gold and silver, we also recover mercury. Mercury is toxic, and elevated levels of it are harmful to the body. We have to protect our personnel from the hazards associated with it, and we have to protect the environment as well. (English)
Mining / Quarry	677	Respirable Dust Sampling	This DVD demonstrates how to correctly collect dust samples. You will learn about the purpose of dust sampling, calibration procedures, the components of the sampling train, and the pitfalls of not sampling correctly. This will also point out some of the more common errors when sampling. (English)
Mining / Quarry	678	Reducing Dust Inside Enclosed Cabs	This video describes the need for structural stability of the cab, proper sealing of cracks and doors for improved positive pressure, and the proper placement of the dust filtration system. (English)
Mining / Quarry	679	The Right Choice	It is everyone's responsibility to make "The Right Choice" regarding danger zones around mining machines. Making the right choice can affect your family, friends and community. This video also discusses best practices and presents personal interviews from miners who were injured by remote control mining equipment. (English)
Mining / Quarry	680	Rock Along	This video exemplifies what can happen in an underground coal-mining environment when shortcuts are taken and production comes before safety. (English)
Mining / Quarry	681	Roof Control	In this MSHA video you will take a look at many important aspects of roof and rib control. Some of the topics included are: roof and rib evaluations, sources of roof/rib hazards, the roof control plan, various myths, identifying hazardous roof conditions, etc. (English)
Mining / Quarry	682	Safety On or Near the Water	This MSHA video discusses the hazards of working on or near the water and the precautions that need to be taken to protect the workers in this situation. (English or Spanish)
Mining / Quarry	683	Silicosis: A Preventable Disease	An employee's questions about the health effects of silica dust exposure are answered. (English and Spanish)
Mining / Quarry	684	Self-Contained Self-Rescuers, A Comprehensive Guide to the Inspection, Care and Use of	This contains 5 videos outlining the "Inspection, Care and Use of Self-Contained Self-Rescuers". In addition the DVD contains a video which illustrates the importance of knowing the effective self-rescue and escape procedures in the event of a mine fire. An important feature of this interactive DVD is the video section regarding the suggested safe transfer process of switching from one SCSR to another SCSR during a mine emergency. (English)
Mining / Quarry	685	Self-Contained Self-Rescuer (SCSR), Care and Maintenance of the Dräger Oxy-K and the Oxy-K Plus S ©	This video demonstrates proper inspection, maintenance and donning procedures of the Dräger Oxy-K Plus and the Oxy-K Plus S. (English)
Mining / Quarry	686	Self-Contained Self-Rescuer, The Inspection, Care, and Use of the OCENCO, Incorporated M-20 ©	This DVD demonstrates proper inspection, maintenance and donning procedures of the Ocenco M-20 Self-Contained Self-Rescuer (SCSR). (English)

Mining / Quarry	687	SLAM for Life - MSHA Risk Assessment	Mining personnel may face many hazards at home, in the office, and at the mine site. When accidents occur, many of them fall into these categories: lifting; slips, trips, and falls; and mounting and dismounting equipment. This training DVD will help you to recognize these types of hazards. (English)
Mining / Quarry	688	SLAM Risks Instructional Guide – including "SLAM Risks" the video	This interactive DVD is intended to be used as introductory materials for risk assessment training. The information in this DVD should help make you more aware of how risk assessment impacts the everyday tasks that are performed in the mining industry. (English)
Mining / Quarry	689	SLAM RISKS the SMART Way – Equipment Guarding	This DVD is intended to recognize and manage hazards encountered on the job. S.L.A.M. is a tool that every miner should use before every task, during the task, and after the task, regardless of the size or complexity. Simply Stop to think about the task; take a few seconds to Look around the area and identify the hazards for each step. On the other hand, S.M.A.R.T. is a tool that is used by mine management that involves miners at all levels of the process. (English and Spanish)
Mining / Quarry	690	Slips, Trips and Falls	Various types of slip/trip/fall accidents are depicted in mining environments. This video stresses the importance of workers thinking safety – and being alert, observant, and cautious. Concluding message is that the best way to prevent slip, trip, and fall accidents is through effective safety training, combined with safe work practices. (English)
Mining / Quarry	691	Stay in the Cab and Keep it On!	A serious equipment roll over accident involving a small articulating front-end loader occurred at a New Jersey quarry in the fall. The survivor of this accident, who is a supervisor at this quarry, shares his story of the events that took place on the day of his accident. (English)
Mining / Quarry	692	Supervising the Unimaginable	Everyone tries to lead responsibly. Will you look at things differently after you've experienced a fatality on your watch? (English)
Mining / Quarry	693	Survivor Stories	
Mining / Quarry	694	"Today's Technology Needs Tomorrow's Heroes" © (MSHA)	Highly trained mine rescue teams have worked diligently in dangerous environments to rescue miners and to recover coalmines. These men and women have been aided by the newest technologies available to protect them and to respond rapidly to the dangers present in coal mines. (English)
Mining / Quarry	695	Time Was Right!, The Mary Lou George (C/MNM)	From miner's daughter to MSHA mine inspector — Mary Lou George tells her inspiring story. She advises to watch out for others and yourself; never lose respect for the mine; and never forget about safety. (English)
Mining / Quarry	696	Truck Haulage Safety Series	The following seven videotapes were produced as a series. Included are: Highway Trucks; Off-Road Trucks; Truck Inspections Conducted by MSHA Inspectors; Inspection of Off-Road Haulage Trucks by an MSHA Inspector; Pre-Operation Inspection of Highway Haulage Trucks; and Visibility and Communications. (English)
Mining / Quarry	697	Underground Electrical Safety	This video discusses some of the more common types of electrical hazards that may be found in underground mines. (English)
Mining / Quarry	698	We Are MSHA	This video is an overview of our MSHA's mission, which is to help improve workplace safety and health conditions in our Nation's mines through enforcement, education and training, and technical support. (English and Spanish)
Mining / Quarry	699	What You Can't See Could Kill Someone!	Blind spots around haul trucks are a major problem for mining operations. To combat this problem, MSHA asked companies to put cameras on their trucks on an experimental basis. This video contains interviews with drivers who used cameras on their trucks and the safety benefits. (English and Spanish)
Mining / Quarry	700	Winter Alert	This video describes the four lines of defense to guard against mine explosions. The four interrelated lines of defense are ventilation, examinations, ignition sources, and rock dusting. (English and Spanish)
Mining / Quarry	701	Workplace Examinations (Surface MNM)	Surface metal and nonmetal mines present a variety of potential safety and health hazards. Effective, thorough, workplace examinations are one way to help you to recognize and address some of these hazards before they become more dangerous. (English and Spanish)
Mining / Quarry	702	Self-Contained Self Rescuer, The Inspection, Care and Use of the CSE SR-100 ©	If you should ever need to escape from your mine through unbreathable air, the SR-100 self-contained self-rescuer will supply about 100 liters of oxygen, or one hour of use. This video will describe the importance of proper inspections, care, and use of this lifesaving apparatus. (English and Spanish)
Mining / Quarry	703	You Are My Sunshine	You Are My Sunshine DVD. A story about the Sunshine Mine fire.
Mining / Quarry	704	Hazards in Motion	Hazards In Motion DVD Hazards In Motion teaches mobile equipment safety for underground miners. The video follows the misadventures of Ben, a new miner with a short attention span and big ego.
Mining / Quarry	738	Aggregate Training for the Safety Impaired ENGLISH and SPANISH	A great DVD that focuses on PPE, Conveyor Safety, Lockout / Tagout, Vehicle Safety, Tire Safety, Task Training, Electrical, Fall Protection, Surge Piles, Horseplay, Highwalls, Work Stress & Fatigue, Weather, Dredges & Ponds (English and Spanish)
Mining / Quarry	739	You Are My Sunshine	You Are My Sunshine DVD. A story about the Sunshine Mine fire.
Mining / Quarry	740	The Sky is Falling	This DVD digs up the dirt and leaving no stone unturned to expose the truth about highwall safety. Learn about highwall safety in surface mining. Slope stability to proper behavior around large mobile equipment. (English)
Mining / Quarry	741	Rock Falls: Making Heavy Metal Means Surviving Hard Rock	This video is a great introduction to the mining cycle and how to avoid rock fall injuries at every step. Trainees will learn how to identify loose rock and the proper steps in barring it down safely. (English)
Mining / Quarry	742	Hidden Scars - Living with Loss - Surviving a Workplace Trauma	This is an account of a fatal rock burst accident that happened in 1994. Don Caparelli and his partner were buried in solid rock for over three hours. Don was rescued and tells his story for the first time. (English)
Mining / Quarry	743	Miner Mike Saves the Day	This video teaches the necessity and use of ground supports. The video uses actual hard rock miners to teach the importance of ground supports underground. (English)
Mining / Quarry	3004	Roof Bolting Machine Operator Skills Training For A Walk-Through Roof Bolter	Roof Bolting Machine Operator Skills Training For A Walk-Thru Roof Bolter. (English)
Retail Safety	484	Retail Safety Orientation	Retail Safety Orientation provides an overview of the different types of workplace hazards that your retail employees face. It focuses not only on grocery store chains but also on small market hardware stores. And it covers a wide range of workplace safety topics. (English, Spanish, Portuguese)
Retail Safety	596	Baler Operation	Excellent training video program to ensure the safety of those persons using cardboard baling equipment. (English)
Retail Safety	597	Convenience Store and Supermarket Safety	This is an excellent training program for convenience stores and small supermarkets. Good for orientation program and refresher. Topics are discussed that cause the most frequent accidents. (English)
Retail Safety	598	Employee Safety Orientation for Supermarkets, Grocers or Convenience Stores	Meets OSHA requirements for training employees in the general hazards to which exposed. Covers clothing, footwear, lifting, electrical safety basics and general safety information for all employees. (English)
Retail Safety	600	Retail Trades Safety Orientation	Meets OSHA requirements for training employees in general hazards to which exposed. Includes basic requirements, electrical, mechanical, back injury prevention, fire protection, personal protective equipment, and more. (English)
Safety Management	320	Heat Illness	Overexposure to high temperatures and humidity can lead to heat-related illness. If not treated, heat illness may cause permanent injury and even death. Early recognition and proper treatment of heat illness can help prevent a medical emergency. (English)
Safety Management	323	A Safety Story	In many cases, a person's safety is in his or her hands. Making a safe or an unsafe choice can make the difference between life and death. Learn how to help avoid accidents by taking responsibility for you own safety. (English)
Safety Management	324	Introduction to Safety: Office Safety	You may think you don't have to worry about safety if you work in an office. But thousands of office accidents happen every year, some serious. To help prevent office injuries, practice good housekeeping and use safe work practices. (English)
Safety Management	330	Hapless Hal Plays the Behavior-Based Safety Game	Every year, thousands of workers die from accidental injuries, and millions more suffer from disabling injuries. In the majority of these accidents, unsafe behaviors are either a direct cause or a major contributing factor. Behavior-based safety programs help employees reduce accidents by focusing on safe work behaviors. (English)

Safety Management	331	Lead in the Workplace	Lead exposure in the workplace can cause serious health problems Exposure occurs in at least 120 different occupations. Lead poisoning can be prevented by taking precautions to avoid over exposure. (English)
Safety Management	335	Workplace Safety: Beating the Odds	When it comes to safety, you can't afford to take chances. Every year, over 5,000 workers are killed in work-related accidents, and another 3.8 million suffer disabling injuries. To reduce the risk of becoming an accident statistic, make safety a part of your job. (English)
Safety Management	339	Supervisor Safety Responsibilities	Supervisors are key figures in a company's safety efforts. By understanding and accepting responsibility for safety, supervisors can help assure a safe workplace and protect the employees they supervise from injury and illness. (English)
Safety Management	353	Working Around Flammables And Combustibles: Hazards	Flammable and combustible materials, used widely in many workplaces, can cause fires and explosions or adverse health affects from overexposure. The first step to safety is to know what kind of material you are working with and the hazards associated with it. (English)
Safety Management	354	Working Around Flammables and Combustibles: Safe Handling and Use	Careless mistakes and safety shortcuts can lead to serious problems when working around flammable and combustible materials. To ensure safety, it's critical to follow basic safety principles. (English)
Safety Management	362	First Aid for Bleeding	Severe bleeding can be life threatening. Learn how to control bleeding by following basic first aid procedures. (English)
Safety Management	363	Good Housekeeping is Good Safety	Clutter and disorder in the workplace contribute to falls, fires, cuts, and other kinds of accidents and injuries. Eliminate hazards and improve productivity by keeping your workplace clean and orderly. (English)
Safety Management	381	Protect Yourself!	This DVD was created by the Australian Asphalt Pavement Association, it demonstrates the proper techniques for protecting yourself on the job site. They can easily be incorporated into a training program. (English)
Safety Management	432	Accident Investigation: The Big Picture	This DVD covers the importance of accident investigation, steps, a team approach, and preparing a report. (English, Spanish, Portuguese)
Safety Management	433	Incident Reporting: You Can Save A Life	It takes only a few words to keep an incident from becoming an accident. This video stresses the importance of safety standards, the ways to control hazards and the necessity of reporting unsafe work conditions. (English)
Safety Management	439	Coaching Safety Performance: Job Safety Analysis	Featuring Florida State head football coach Bobby Bowden, this training package is packed with information showing supervisors and employers how to actively support a safe workplace by coaching safe work habits. (English, Spanish, Portuguese)
Safety Management	470	Hearing Protection: It Makes Sense	You won't know that you're losing the ability to hear until you already have. It is a silent and gradual process, caused by consistent and prolonged exposure to abnormal noise levels. Learn how to protect yourself. (English)
Safety Management	473	Laser Safety: The Blink of An Eye	This video aims to provide basic laser safety awareness. (English)
Safety Management	474	Lead Safety: On The Job	This program helps your facility comply with OSHA's Lead in Construction Standard (1926.62). It examines the ways lead can enter the body, its symptoms and its effects. Protect yourself and your employees from dangerous lead exposure. (English)
Safety Management	476	PPE: Don't Start Work Without It	At work, every part of the body is vulnerable to accidents, and you have to make sure that your employees are well protected. They face unique dangers, depending on the job. This comprehensive PPE program, covering eye, face, hearing, head, hand and foot protection and other PPE rules can help. (English, Spanish, Portuguese)
Safety Management	480	Recognizing Drug and Alcohol Abuse: For Employees	This important program will help employees recognize alcoholism and drug abuse in the workplace and show them what to do about it when they do. (English, Spanish, Portuguese)
Safety Management	481	Recognizing Drug and Alcohol Abuse: For Managers	This important program will help supervisors and managers recognize alcoholism and drug abuse in the workplace and help reduce missed work days, increase productivity and protect worker health and safety. (English, Spanish, Portuguese)
Safety Management	486	Workplace Violence: The Calm Before The Storm	In one year alone, workplace violence accounted for one out of five work-related deaths in the U.S. This program is designed to help supervisors and employees identify the warning signs of workplace violence and prevent it. (English)
Safety Management	495	Hi Vis Product (Scotchlite Reflective) by NASCO	This DVD shows the difference between someone wearing reflective clothing and someone not wearing reflective clothing. Would be a good DVD for a short safety meeting with workers that must wear reflective clothing. (English)
Safety Management	498	Safety Talks!	Covers these topics: Cold Water Shock, Know Flammables Basics, Avoid Chemical Exposure, Coke Oven Emissions, Noise Hazards, Meeting Tips for Leaders, Safety Posters. (English)
Safety Management	499	OSHA Walkthrough for Manufacturers	This video that explains OSHA inspections, and OSHA requirements like recordkeeping, walking and working surfaces, confines spaces, hazard communication and lockout-tagout. (English)
Safety Management	519	Hearing Conservation	Designed to heighten awareness of hearing conservation in the workplace. Explains the anatomy of the ear, how noise causes hearing loss and how to prevent hearing loss. (English)
Safety Management	520	Respirator Training: The New Rules	Respiratory protection is necessary for many tasks such as sandblasting, spray painting, brake dust protection, and more. This program addresses the need and use of common respiratory protection. (English)
Safety Management	531	Basic First Aid	What should you do when you're faced with some of life's most common emergencies? This video will show you how to react when you're called upon to deliver first aid. (English)
Safety Management	532	Infant & Child CPR	This DVD is for not only parents, but also grandparents, babysitters, aunts, uncles - pretty much everyone since there will come a time in most people's lives when they will need to watch after a young child. (English and Spanish)
Safety Management	571	Unsafe Acts: Human Behavior	The vast majority of accidents in the workplace are caused, in whole or in part, by unsafe acts of employees. The major emphasis of this program is reducing unsafe acts through education. (English)
Safety Management	572	Workplace Accident Causes and Prevention	Short program for training employees in the vast majority of accident causes unsafe acts and how to prevent them. Most accidents are caused by unsafe acts, therefore the majority of safety efforts should be in reducing these types of acts. (English)
Safety Management	573	Causes and Avoidance of Accidents	Video is designed for employees to show how their unsafe acts or behavior are the cause of most accidents and how they can improve the reduction of accidents. (English)
Safety Management	594	Safety Orientation for Office Personnel	Designed for office workers and focuses on the most common hazards and resulting injuries in an office. Discusses chairs, ladders, office equipment, video display terminals, safe lifting, fire prevention, and more. (English)
Safety Management	595	Office Safety Basics	Surveys the safety issues of working in an office environment, which has its own set of dangers and hazards, including slips, trips, falls, open file drawers, and dangerous paper cutters. A brief survey of good ergonomic technique. (English)
Safety Management	603	Drug Testing in the Workplace	Explains why drug testing/screening is necessary, general drug policies, and how tests are conducted. Emphasizes lab efforts to protect employee rights and how tests are conducted. Excellent program for introducing drug abuse programs to employees. (English)
Safety Management	604	HOW TO DEVELOP AN EFFECTIVE SAFETY PROGRAM	This safety training program is designed for managers, assistant managers, and department managers. Safety engineers take you step by step through the methods of reducing accidents and injuries. (English)
Safety Management	605	Safety Committees: The Real Story	This program explains how to make a safety committee effective without wasting time or effort. A working safety committee can be a very valuable asset to your business. (English)
Safety Management	606	Safety and the Supervisor	Supervisors are responsible for safety, not the company safety manager. This video explains a safety program, how the supervisor's actions, enforcement of safety rules, and legal responsibilities are the key factors in an effective program. (English)
Safety Management	629	Dog Bite Prevention	Dog bites are the number one injury for meter readers, mail carriers, and residential service employees. Details techniques for recognizing problem animals, as well as confrontation prevention. (English)

Safety Management	643	7 Things Never to Say to Your Customers	With the advice presented in this new program, you'll learn to avoid these service killers and naturally end up providing customers with the care and professional service they deserve, boosting customer loyalty to new heights! (English)
Safety Management	644	Speaking to One Person or a Roomful	In this video, you'll discover how to enhance the two most primary communication tools: your tone of voice and your body language. And, you'll learn the exact words to say – and what to do – in difficult situations. (English)
Safety Management	705	Violence on the Job	This video discusses practical measures for identifying risk factors for violence at work, and taking strategic action to keep employees safe. (English)
Safety Management	728	Take Back Your Time: How to Manage Your Workload and Still Have A Life	How many hours do you think the average worker spends at the office every week? Would you believe 60? And that number is going up! (English)
Safety Management	745	Respiratory Protection: Another World	Breeze through the airborne dangers with this program. Comply with OSHA 1910.134 and help workers avoid exposure to hazardous substances, which lead to serious health effects and other chronic illnesses. (English, Spanish, Portuguese)
Safety Management	764	Equipment Guarding- Two Discs (Copy 1)	Disc #1: Risks, hazards, and guard construction Disc #2: Guarding Mine Equipment
Safety Management	764	Equipment Guarding- Two Discs (Copy 2)	Disc #1: Risks, hazards, and guard construction Disc #2: Guarding Mine Equipment
Safety Management	766	Fire Safety	Be prepared to keep yourself and your team safe in the event of a fire. This training course covers the nature of fire, preventative and protective measures, fire sprinklers, smoke detectors, alarms, extinguishers, evacuation, and the stop-drop and roll technique. (English)
Safety Management	769	Lockout/Tagout: When Everyone Knows	This video not only explains how to comply with OSHA regulations for isolating and shutting down power to equipment, but also reinforces how easily accidents can occur—especially during repair work—when proper procedures aren't followed. (English)
Safety Management	770	Workplace Violence: The Missing Link (Copy 1)	In this original Paladin video production, self-defense expert Bill Kipp teaches you the verbal and psychological skills you need to preempt violent attacks and end fights before they start. (English)
Safety Management	770	Workplace Violence: The Missing Link (Copy 2)	In this original Paladin video production, self-defense expert Bill Kipp teaches you the verbal and psychological skills you need to preempt violent attacks and end fights before they start. (English)
Safety Management	771	Safe in the Street	This video will teach you how to recognize danger signals prior to an attack so you can avoid becoming the latest victim of street crime. (English)
Safety Management	775	Verbal Communication Skills for Critical Incidents	Saying the wrong thing to the wrong person can make a bad situation worse and can lead to violence, injury or a lawsuit. Dealing with a suspicious person, disgruntled spouse, or intoxicated person. Showing compassion, avoiding verbal pitfalls, and exercising the correct communication phrases, anyone can de-escalate an emotional crisis. (English)
Safety Management	776	Use of Force: Liability Reduction	The Reasonableness Standard and how it applies to your security role. What a police officer can do vs. what a civilian is allowed to do. The Use of Force Continuum and the necessary steps to take to reduce liability. (English)
Safety Management	777	Managing Your Anger- Maintaining Your Professionalism	You will learn: The role of anger during a crisis, steps for managing anger, ways to express anger, and how to rationally detach. (English)
Safety Management	778	The Flip Side of the Story: Who Do Incidents Really Impact?	Shondell, Chad's wife, relates the story of that fateful day when Chad took a short cut and became paralyzed. Her down-to-earth approach is an authentic and accurate view of her feelings and her thoughts. The impact Chad's split-second choices made that day affected literally thousands of people. (English)
Safety Management	779	Working with Stress	Describes workplace factors that can create or exacerbate worker stress, and suggests practical measures for reducing job-related stress through changes in work organization. (English)
Safety Management	782	Facing Violence: 7 Things Every Martial Artist Must Know	This video explains seven elements that must be addressed to adapt your self-defense training for the most common types of street violence. (English)
Safety Management	783	Breaking Up Fights	A safe, systematic approach to intervening in verbal or physical conflicts. (English)
Safety Management	785	The Preventative Techniques II	Nonviolent crisis intervention. How to identify behavior levels, how to intervene, how to use nonverbal and verbal techniques, and how your attitude affects others' behavior. (English)
Safety Management	789	Heat Stress Safety (NEW 2015)	Many workers are exposed to extreme heat conditions during the course of their workday and are at risk of heat stress. Exposure can lead to illness, injuries and even death. Extreme heat can also increase the risk of workers injuring themselves and others. This training program will look at the different components of heat stress to help you understand the hazards and dangers associated with heat stress and educate you on ways to prevent it and protect yourself from illness and injury. (English)
Safety Management	790	First Aid Safety (NEW 2014)	Employees need to be prepared and know the steps to take when an accident or injury occurs. Knowing the correct procedures to follow could minimize the injury and even save a life. (English)
Safety Management	793	Personal Protective Equipment (NEW 2017)	Protective equipment, including personal protective equipment for eyes, face, head, and extremities, protective clothing, respiratory devices, and protective shields and barriers, shall be provided, used, and maintained in a sanitary and reliable condition wherever it is necessary by reason of hazards of processes or environment, chemical hazards, radiological hazards, or mechanical irritants encountered in a manner capable of causing injury or impairment in the function of any part of the body through absorption, inhalation or physical contact. (English)
Safety Management	3011	Machine Guarding Safety	Designed to help employees understand the dangers of working with machinery... and how those risks can be minimized by proper installation and use of safety guards and devices. (English)
Safety Management	3012	Fire Prevention in the Office	Look at fires in office environments, review steps that can be taken to help prevent fires and discuss what employees should do in case of a fire emergency. (English)
Safety Management	3013	Safety Showers and Eye Washes	Review for employees situations where safety showers and eye washes should be used, as well as how to properly use them. (English and Spanish)
School Safety	477	Safety Orientation for Schools	Covers back safety and ergonomics, classes of fire, hazard communication, slips & trips, electrical safety and housekeeping. (English, Spanish, Portuguese)
School Safety	601	Safety Orientation for School Teachers	This video is about general hazards in the classroom and school environment. Suitable for both inexperienced and experienced teachers, it covers electrical and mechanical safety, lifting, ladders, accident prevention and reporting, chemicals, and more. (English)
School Safety	602	Safety Orientation for Custodial and Maintenance Staff	This safety orientation program for school custodians discusses general hazards on the job, including hand and power tools, electricity, machine operations, lifting, fire, asbestos, personal protection equipment, and more. (English)
School Safety	615	Safety Orientation for School Administrators	This safety training program meets OSHA requirements for offices, school yards, and other school topics. Topics include lifting, ladders, accident reporting and prevention, and much more. (English)
School Safety	784	Fights at School	Techniques for prevention of fights, verbal techniques for early intervention, nonviolent physical crisis intervention techniques. (English)
School Safety	786	Preventing Problem Behavior on Your School Bus	Shows nonviolent crisis intervention to ensure the safety and security of everyone on your bus. (English)
School Safety	3014	Orientation to Laboratory Safety	This video shows employees the importance of safety in the laboratory... as well as review the OSHA regulations and good safety practices that apply to laboratory environments. (English)
School Safety - Custodial / Janitorial	377	Cleaning / Polishing Floors Without Slips and Falls	Designed to improve floor surface appearance and reducing the possibility of slips and falls. This video trains janitor or custodians on how to reduce the effects of slips and falls. (English)
School Safety - Custodial / Janitorial	431	Bloodborne Pathogens for Custodians	A custodian's job has a lot of risks, and one of them is exposure to bloodborne pathogens. This program teaches your staff protective measures against these organisms. It also explains effective cleaning methods, proper disposal and safety measures. (English)
School Safety - Custodial / Janitorial	580	SAFETY ORIENTATION AND ACCIDENT PREVENTION for Custodial or Janitorial Workers	Meets OSHA training requirements for exposure to general hazards. Basic safety information suitable for training new and experienced employees. (English)

Universal Safety	795	Active Shooters & Workplace Violence (NEW 2015)	Video focuses on how to prepare you and your employees for an active shooter situation and how to stay safe.
Universal Safety - Bloodborne/Airborne Pathogens	355	Bloodborne Pathogens Overview	Anytime you come into contact with blood or other body fluids, you risk exposure to microorganisms that cause bloodborne diseases. These infectious materials are known as bloodborne pathogens. Workers exposed to bloodborne pathogens risk serious illness or death. (English)
Universal Safety - Bloodborne/Airborne Pathogens	356	Airborne Pathogens	Airborne diseases are spread through microscopic droplets released into the air, usually when an infected person coughs or sneezes. Airborne pathogens include influenza, chicken pox, measles and mumps, as well as more dangerous diseases such as tuberculosis, plague, botulism, smallpox, and anthrax. Fortunately despite the presence of contagious airborne pathogens, there are steps we can take to reduce the risk of infection. (English)
Universal Safety - Bloodborne/Airborne Pathogens	429	Bloodborne Pathogens: Know the Risk	Teach your employees how to protect themselves from bloodborne pathogens with this information-packed program. The three types of viruses - HIV, HBV and HCV - and how they spread, how to avoid exposure, and housekeeping tips are all covered. (English, Spanish, Portuguese)
Universal Safety - Bloodborne/Airborne Pathogens	496	MRSA – The Ticking Time Bomb	Antibiotic resistant germs including methicillin resistant staph (MRSA) are a growing concern because they spread easily from person to person and are appearing at epidemic rates. (English)
Universal Safety - Bloodborne/Airborne Pathogens	497	Poison Oak and Ivy Training	Video helps viewers identify, prevent and treat poison oak, ivy and sumac. (English)
Universal Safety - Chemicals & Hazard Communication	334	Hazardous Chemicals	Many chemicals, while powerful, are hazardous by nature. When used correctly, they will do the job they're designed to do. But if misused or mishandled, hazardous chemicals can cause serious injury or even death. (English)
Universal Safety - Chemicals & Hazard Communication	343	Haz Com – Your Right To Know	Exposure to hazardous chemicals poses serious health and safety risks. To reduce the risk of illness or injury caused by hazardous chemicals in the workplace, OSHA has developed the Hazard Communication Standard, also known as the Right-to-Know Act. (English)
Universal Safety - Chemicals & Hazard Communication	345	Haz Com – Labels	Under OSHA's Hazard Communication Standard, each container of hazardous chemicals in the workplace must be labeled, tagged, or marked with the identity of the chemical and must show hazard warnings appropriate for employee protection. (English)
Universal Safety - Chemicals & Hazard Communication	346	Safety Signs	Safety signs provide a visual warning for hazardous situations. As part of their training, employees are required to have instruction in basic sign language. Understanding and obeying signs can help prevent accidents and save lives. (English)
Universal Safety - Chemicals & Hazard Communication	360	Keeping an Eye on Safety	Every day, approximately 1,000 eye injuries occur in America's workplaces. It's estimated that 90 percent of these could be avoided with proper eye protection. (English)
Universal Safety - Chemicals & Hazard Communication	384	Chemical Safety (with instructor guide)	Basic chemical safety program for employees whose jobs involve using, handling, storing, or disposing of chemicals. (English)
Universal Safety - Chemicals & Hazard Communication	436	Chemical Handling Safety: Corrosives	This program teaches how to recognize, use, and handle corrosive materials safely. (English, Spanish, Portuguese)
Universal Safety - Chemicals & Hazard Communication	437	Chemical Handling Safety: Flammables	Fire is always a threat at work and flammable chemicals only increase the chances of one occurring. But with this program, your employees can take the heat out of these risks by knowing how to handle flammables properly. (English, Spanish, Portuguese)
Universal Safety - Chemicals & Hazard Communication	438	Chemical Handling Safety: Solvents	Solvents are tricky, and if handled improperly, can cause dangerous accidents. But with this program, your employees will gain knowledge about solvents, including preparation and good work practices. This way, not only will your company get the most out of solvents but you also ensure everyone's safety. (English, Spanish, Portuguese)
Universal Safety - Chemicals & Hazard Communication	462	Hazard Communication: The Road to Safety	OSHA regulations are strict and, if violated, can be costly. The road to safety and compliance starts with this program, which offers vital information to help your employees identify hazards and understand warning labels and MSDSs. (English, Spanish)
Universal Safety - Chemicals & Hazard Communication	503	Safety Video Compilation on Hazardous Materials	This DVD contains all CSB Safety Videos released prior to 2008. (English)
Universal Safety - Chemicals & Hazard Communication	515	Hazard Communication	Meets OSHA's right to know requirements. Explains material safety data sheets, labels, and general information on using or handling hazardous materials. (English)
Universal Safety - Chemicals & Hazard Communication	574	Testing and Monitoring for Hazardous Gases	General awareness and basic safety for persons who must test and monitor for hazardous gases in such areas as trenching operations, confined space entry, and others areas. (English)
Universal Safety - Chemicals & Hazard Communication	729	Chlorine Emergencies: An overview for First Responders	The material is organized on an easily navigable DVD which includes a main segment of approximately 20 minutes which covers the basics of the response for a chlorine spill and what to do in that critical first 15 minutes. (English)
Universal Safety - Chemicals & Hazard Communication	792	Hazard Communication Safety Training (NEW 2012)	These new revisions to OSHA's current Hazard Communication Standard, the GHS is expected to prevent injuries and illnesses, save lives and improve trade conditions for chemical manufacturers. The Hazard Communication Standard in 1983 gave the workers the 'right to know,' but the new Globally Harmonized System gives workers the 'right to understand. (English)
Universal Safety - Compressed Gas Cylinders	319	Gas Cylinders-Overview	Compressed gas cylinders present two types of hazards: Chemical hazards associated with the contents of the cylinders, and the physical hazard posed by steel cylinders maintained under pressure. To help ensure safety, careful procedures are necessary when handling and storing compressed gases. (English)
Universal Safety - Compressed Gas Cylinders	3010	Compressed Gas Cylinders	MARCOM's training products on "Compressed Gas Cylinders" provide the information employees need to handle and transport these potentially volatile storage containers. (English and Spanish)
Universal Safety - Confined Spaces	489	Confined Space Entry: Permit Required	This video reviews the details on how to prepare a confined space entry permit and the best way to train a confined space entry team and stay in compliance with OSHA 1910.146. (English, Spanish, Portuguese)
Universal Safety - Confined Spaces	500	Kinetic Confined Space Rescue System	DVD discusses the Kinetic Confined Space Rescue System. This is a good quick DVD for a confined space rescue or confined space safety meeting. (English)
Universal Safety - Confined Spaces	537	Lockout / Tagout for Confined Space Entry	This interactive worker training DVD emphasizes the need systematically to shut down all live energy sources before doing equipment repairs. Includes in-depth training in HAZCOM, Hot Work, Qualified Electrician, and Lockout-Tagout. (English)
Universal Safety - Electrical	336	Danger: High Voltage	"Danger: High Voltage" means that contact with or dangerous proximity to high voltage electrical systems can cause serious injury or even death. Always exercise extreme caution when working on or near high voltage electrical lines or equipment. (English)
Universal Safety - Electrical	347	Understanding Electricity	Whatever your job is, you probably depend on electricity to provide services you need. But do you ever give any thought to the dangers electricity presents? Learn steps you can take to stop potential electrical hazards before they stop you. (English)
Universal Safety - Electrical	447	Electrical Safety: Basic Principles	Anyone working with electricity must know and apply basic safety principles and proper emergency procedures. This popular program defines common electrical terms and explains housekeeping & circuit protection devices. (English, Spanish, Portuguese)
Universal Safety - Electrical	493	Tecasafe Plus Arc Flash Product DVD	This DVD is good for anyone wanting to learn more about arc-flash protection, fabrics, and how these materials are tested.
Universal Safety - Electrical	494	ArcWear Products by NASCO	This DVD is good for anyone wanting to learn more about arc-flash protection, fabrics, and how these materials are tested.

Universal Safety - Electrical	539	Electrical Safety: Basic Facts	Electricity is all around us. Learn how to use this powerful source of energy without putting yourself at risk. (English)
Universal Safety - Electrical	583	Ground Fault Circuit Interrupter Safety Training	Designed to train all employees in the use of GFCIs and how the system works. Excellent program to increase electrical safety awareness. Program also explains elements of the mandatory GFCI written program. (English)
Universal Safety - Electrical	645	Arc Flash Awareness	The dangers of arc flash are demonstrated through three testimonials. Causes, PPE, and safety recommendations are included. Information and discussion topics for electrical workers. (English)
Universal Safety - Electrical	720	Electrical Safety for Construction Workers	This product enables field-level employees to recognize and promote safe electrical practices in and around the construction site. It addresses site-specific hazards and controls and provides real-world solutions. (English)
Universal Safety - Ergonomics	373	Back Injury Prevention	Addresses lifting hazards and demonstrates how to lift safely. Specific techniques are required in the wide variety of lifting tasks in the hotel/motel industry. (English)
Universal Safety - Ergonomics	435	It's your back: Don't break it!	While your EMTs, firefighters and law enforcement officers take care of others, you have to take care of them. To keep them healthy, lean on these solid safety techniques and exercises to keep their back muscles strong and flexible. (English, Spanish, Portuguese)
Universal Safety - Ergonomics	452	Office Ergonomics: It's Your Move	This DVD covers musculoskeletal disorders (MSDs). From pinched nerves and strained muscles to inflamed tendons and sore necks, these mild injuries occur when our bodies take a beating beyond their ability to recover. This program examines the nature of this problem and what you and your employees can do to prevent it. (English, Spanish, Portuguese)
Universal Safety - Ergonomics	516	Preventing Back Injuries (SPANISH)	Provides an understanding of how the back functions, and safe lifting techniques. (Spanish)
Universal Safety - Ergonomics	584	Ergonomics and Computer Monitors	Monitors are used in all offices. Improper use can lead to ergonomic injuries. This video covers work area adjustments, lighting/glare, workstation seating, screen positioning, good work practices, and accessories. (English)
Universal Safety - Ergonomics	756	Ergonomics & The Power of Stretching (Copy 1)	10 short videos (5-15 minutes each). Your employees will practice activities and stretches to prevent the most common work-related musculoskeletal disorders. (English)
Universal Safety - Ergonomics	756	Ergonomics & The Power of Stretching (Copy 2)	10 short videos (5-15 minutes each). Your employees will practice activities and stretches to prevent the most common work-related musculoskeletal disorders. (English)
Universal Safety - Ergonomics	756	Ergonomics & The Power of Stretching (Copy 3)	10 short videos (5-15 minutes each). Your employees will practice activities and stretches to prevent the most common work-related musculoskeletal disorders. (English)
Universal Safety - Fall Protection	388	Fall Protection	The video highlights key prevention measures through the use of guardrails, personal fall arrest systems, slide guards, safety nets, aerial and fork-lift baskets, and other safety equipment. (English and Spanish)
Universal Safety - Fall Protection	402	Thinking About Fall Protection	Thinking About Fall Protection introduces you to an informative aspect of the fall protection industry requirements. You'll have the confidence of being provided with fall protection knowledge ranging from compliant to expert solutions. (English)
Universal Safety - Fall Protection	403	Steep Slope Roofing: Don't Let it Slide	Teach your workers the specific safety requirements for steep-slope roofing work with this DVD. Various types of fall-protection systems are addressed, as well as other hazards associated with steep-slope roofing work. (English and Spanish)
Universal Safety - Fall Protection	455	Personal Fall Protection: One Step Beyond	Each year around 150 to 200 workers are killed and more than 100,000 are injured because of falls. When your workers are working at heights, you cannot let safety standards come crashing down. This training program, based on Subpart M of OSHA Standard 1926, highlights fall protection measures for general industry employees. (English)
Universal Safety - Fall Protection	492	SafeWaze ReLoad Retractable Lifelines	This is a good DVD that talks about the SafeWAZE ReLoad retractable lifelines. Useful for anyone wanting to know more about retractable lifelines. (English)
Universal Safety - Fall Protection	561	DBI / SALA First Man Up System	This program details the setup and usage of DBI-SALA's First-Man-Up™ system. It allows an "at-risk" worker a simple and easy way to anchor a fall protection device to a location overhead and beyond normal reach. This video reviews the complex fall protection principles, as well as potential problems involved with horizontal lifeline systems. (English)
Universal Safety - Fall Protection	562	Advanced Portable Tanker Access Ladder System	An 11 minute demonstrational DVD that introduces you to the DBI-SALA Advanced Portable Tanker Access Ladder System. This production covers a wide range of product features and demonstrates how to safely operate it. (English)
Universal Safety - Fall Protection	563	Harness Donning & Fall Protection Equipment Inspection	This DVD contains demonstrations showing you how to properly don and care for a variety of DBI-SALA and PROTECTA harnesses. We'll also show you what to look for before using or storing your fall protection equipment after a hard day's work. (English)
Universal Safety - Fall Protection	564	Fall Rescue Training 101	This educational DVD was created to introduce fall-protection "freshmen" to OSHA and ANSI standards, DBI-SALA fall-protection equipment and a few of the most common rescue scenarios associated with construction work. (English)
Universal Safety - Fall Protection	565	Vacuum Anchor System	Vacuum Anchor Training shows the End User how to use, inspect and maintain the Vacuum Anchor system on aircraft. This video is a directive for people who have already purchased a Vacuum Anchor system. (English)
Universal Safety - Fall Protection	566	Rescue Davit System	Includes complete instructions for setup and takedown of the DBI / SALA Rescue Davit System. (English)
Universal Safety - Fall Protection	660	Fall Protection: Your Lifeline to Safety	This video provides an overview of the hazards associated with doing work at elevated locations and the importance of fall protection. (English and Spanish)
Universal Safety - Fall Protection	721	Fall Protection Training Discover the TACBR'S of Safety	This DVD provides serious Fall Protection Gear to save your life. You should supplement our fun video introductions with OSHA training courses or other in-depth courses that discuss Fall Protection in a monotonous way. (English)
Universal Safety - Fall Protection	722	Fall Protection Rescue and Retrieval: Developing a Rescue Plan	This DVD provides serious Fall Protection Gear to save your life. You should supplement our fun video introductions with OSHA training courses or other in-depth courses that discuss Fall Protection in a monotonous way. (English)
Universal Safety - Hand & Power Tools	340	Hand Safety	Every year, millions of people suffer serious hand injuries because they expose their hands to various workplace hazards. To minimize the risk of injuries, it's important to recognize hazards, follow safe work practices, and use protective equipment appropriate for the task you are performing. (English)
Universal Safety - Hand & Power Tools	359	Your Hands at Work	Your hands are your most valuable tools. You can help prevent hand injuries by wearing appropriate protective gloves. (English)
Universal Safety - Hand & Power Tools	389	Chainsaw Safety, Maintenance and Cutting Techniques	Safe and efficient use of chainsaws requires thorough training. The basics of chainsaw safety and use are taught in an easy-to-understand format. (English)
Universal Safety - Hand & Power Tools	411	Powder Actuated Tools	Adequate training is a requirement for these tools because they are dangerous! This video explains equipment, safety procedures, types of loads, potential hazards and how to safely operate the equipment. (English)
Universal Safety - Hand & Power Tools	412	Portable Grinders & Abrasive Wheels (Leader Kit Included)	Grinders and abrasive wheels are some of the more common tools in industry today yet they account for a disproportionately high percentage of injuries on the job. This video demonstrates the proper procedures for safe use, care and maintenance of grinders and abrasive wheels. (English)
Universal Safety - Hand & Power Tools	461	Powered Hand Tool Safety: Handle with Care	Safety is literally in your workers' hands. They have to be expert handlers of powered hand tools, and they must know these devices inside and out. This video explains PPE, pre-use inspection, predicting dangers and housekeeping. (English, Spanish, Portuguese)
Universal Safety - Hand & Power Tools	609	Table & Radial Arm Saw	This important table saw safety training video will show your employee's the importance of using their saws safely. Kick back, eye protection, hearing protection, and machine guarding are discussed in this brief video. (English)
Universal Safety - Hand & Power Tools	621	Chain Saw Safety, Operation & Maintenance	Over an hour of information on how to properly use and care for your chain saw. Multiple chapters include chain saw features, maintenance, saw chain sharpening, protective apparel and proper operation. (English)

Universal Safety - Hand & Power Tools	622	Proper Operation of Leaf Blowers	Explains the highlights of using a leaf power blower, safety and proper usage of the power blower. Includes jobsite safety as well. (English)
Universal Safety - Hand & Power Tools	623	Safe Use of Cutoff Saws	How to properly use and care for your cut-off machine. This video includes cut-off machine features, understanding authorized wheels, PPE, safe transportation, pre-use inspection and maintenance, fueling, starting, and usage. (English)
Universal Safety - Hand & Power Tools	624	Hand Tool Safety in the Workplace	This video includes over 100 common uses and abuses of hand tools by tool users. Viewers are alerted to hand tool safety practices that prevent accidents. (English)
Universal Safety - Hand & Power Tools	625	Hand Tool Safety Kit	This DVD includes information on how to safely operate various hand tools. (English)
Universal Safety - Hand & Power Tools	716	Safe and Efficient Operation of Hand-Held Cutoff Saws	This DVD focuses on the safe and proper operation of gasoline powered cutoff saws. Includes: saw adjustments, safety devices, correct blade type and application, saw starting techniques and the care and cleaning of saws. (English)
Universal Safety - Hand & Power Tools	717	Power and Hand Tool Safety	Protect workers from common everyday hazards created by the use of the hand and power tools with this new product. It features practical, safe application of common hand and power tools. (English)
Universal Safety - Hand & Power Tools	732	Chain Saw Safety DVD SPANISH	Chain saws are responsible for thousands of injuries per year, and this DVD is good viewing for anyone using chain saws. (Spanish)
Universal Safety - Hand & Power Tools	733	Safety Video	This is a compilation DVD of 4 components: Trimmers, Hedge Clippers, Chain Saws, Power Pruners. (English and Spanish)
Universal Safety - Hand & Power Tools	734	Safety Video	This is a compilation DVD of 4 components: Trimmers, Hedge Clippers, Chain Saws, Power Pruners. (English and Spanish)
Universal Safety - Hand & Power Tools	774	Safety Series: Power and Hand Tool Safety	This video covers common everyday hazards from the use of the hand and power tools. It features practical, safe application of common hand and power tools, including: electrical, pneumatic, gasoline, power activated, hand, battery operated and hydraulics tools. (English)
Universal Safety - Slips and Trips	478	Slips, Trips and Falls – Taking the Right Step	Slips, trips and falls cause injuries in the workplace, and you have to smooth out the risks through this DVD that covers various safety measures: awareness, good housekeeping and proper equipment use. (English, Spanish, Portuguese)
Universal Safety - Slips and Trips	479	Step By Step: Avoiding Slips Trips and Falls	This step-by-step guide that alerts your employees to the serious consequences of falls and explains how they can be prevented. (English, Spanish, Portuguese)
Universal Safety - Slips and Trips	753	Slips, Trips, and Falls	This video covers industries such as warehouse, manufacturing or office environments related to slip, trip and fall hazards. (English)
Universal Safety - Slips and Trips	765	I Can't Get No Traction	Features a variety of realistic slip, trip and fall stunts that teach memorable lessons on distracted walking, running, poor housekeeping, improper ladder use, spills, moving equipment and wearing improper footwear. (English)
Universal Safety - Slips and Trips	780	Slips, Trips, & Falls: Keeping Your Workplace Safe	This video shows specific procedures that can raise safety awareness throughout your organization and help prevent incidents related to slips, trips and falls. (English)
Universal Safety - Welding	322	Gas Cylinders – Welding, Cutting, Brazing	Gas cylinders used in welding, cutting and brazing operations contain potentially dangerous gases under high pressure. Certain actions, such as rough handling, exposure to electrical circuits or heat sources, and improper storage can lead to serious accidents. Make sure you're familiar with the potential dangers, and take precautions when handling, using, and storing fuel-gas cylinders. (English and Spanish)
Universal Safety - Welding	325	Introduction to Safety: Warehouse Industry	Warehouses can be dangerous because there is so much activity. Common injuries include back injuries related to heavy lifting and accidental injuries involving powered industrial trucks. To stay accident-free, use safe work practices and stay alert for potential hazards. (English)
Universal Safety - Welding	485	Welding: Safe Work with Hot Work	In hotwork operations, safety is a burning issue. But through this program, you can cool down the risks and torch the dangers. (English, Spanish and Portuguese)
Universal Safety - Welding	505	Workshop Safety: Welding	The dangers of welding, and how to avoid serious injury or death when working with welding equipment. This DVD teaches students how welders deal with extreme heat and hazardous situations, as well as what makes a successful welder. (English)
Universal Safety - Welding	510	Health and Safety Factors in Welding	This DVD is to educate welders on potential health and safety concerns in this occupation. (English)
Universal Safety - Welding	608	Health Factors in Welding Operations	This program is designed to explain health hazards in welding operations and how to make the job safer and healthful by following industry safety and health procedures. (English)
Universal Safety - Woodshop	534	Basic Woodshop Safety	Many types of precautions are discussed for those who work in a woodshop. (English)
