

MEM Learning Management System (LMS)

Every industry has its risks. Employees who know how to navigate those risks can work with confidence. They're happier, safer and healthier – and that's good for business.

We believe there's no one-size-fits-all solution to safety training. Our Safety and Risk Services Team can help you design a training program that matches your company, your employees and your unique environment.

ON-DEMAND VIRTUAL LEARNING

We offer free access to a vast library of training titles through the MEM Learning Management System (LMS). Engage your employees in flexible online learning and track their progress in courses covering return to work, OSHA requirements, and a variety of other safety topics.

BENEFITS OF THE LMS

- Free access for all users
- Reduce learning time and costs
- Flexible learning schedule
- Classroom training or individual training options by computer or smart phone
- Increase employee engagement and motivation
- Easily track learner progress and performance
- Large library of safety titles to meet your training needs
- Industry related learning plans
- Management courses available
- Certificates of completion
- Continuing Education Units
